If a product fails due to a manufacturing fault, VitrA will offer a free replacement or replacement parts. If a product is not available, VitrA will offer an alternative to the same value.

ICON GUIDE

WATER SAVING

VitrA water saving WCs, marked with this symbol, have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litres) and normal (3/6 litres) water volumes.

By using less water, whilst still delivering efficient flushing, these water saving WCs benefit you and the environment. All VitrA wall-hung frames come with dual flush function as standard in both 2.5/4 litre and 3/6 litre options.

ACCESSIBLE

These products are wheelchair accessible and provide enhanced convenience in the bathroom.

SPACE SAVING

A wall-hung WC solution takes up less room than a conventional WC, and the concealed installation offers flexibility in confined spaces. The range of compact WCs have a shorter projection, saving even more space.

RIM-EX TECHNOLOGY

Effortless cleaning and innovative, hygienic design. VitrA's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

The purpose of WRAS is to contribute to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Scottish Water Byelaws.

INTRODUCTION

Cutting edge technology, contemporary and innovative designs, reliability and sustainability are the cornerstones of VitrA.

Our innovative products are inspired by the celebrated design principles of Turkish bath culture, translated to meet the style and standards of modern living.

Each product has the power to refine and transform the bathroom space it is installed in, combining practicality with pleasing aesthetics and the reassurance of high quality materials.

Our extensive range of sanitaryware, furniture, brassware and complementary items provide a total bathroom solution designed to be installed with ease.

VITRA PROVIDES PERFECT WALL-HUNG FRAMES AND FLUSHING SOLUTIONS THAT ENABLE YOU TO COMPLETE YOUR PROJECT WITH EASE

AWARDS / ACCREDITATIONS

DESIGN EXCELLENCE RECOGNISED

The superior design, quality and innovative features of Vitra products are acknowledged with some of the world's most prestigious awards.

Bella
Vitra Design Team

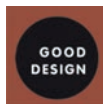

M-Line
Rim-Ex with Vitra fresh
NOA

Sirius
Vitra Design Team

Vitra's successful relationships with international designers has led to the company winning many accolades for its products. Among these are the Wallpaper Design Award, Elle Deco Award, Good Design Award and Red Dot Design Award. Vitra has received three iF product design awards for excellence in product and design quality.

ACCREDITATIONS

Vitra products have been developed to comply with British and European standards. Vitra is accredited to ISO 9001, ISO 14001, EN 16001 and OHSAS 18001. Vitra also conforms to WRAS flushing standards, BREEAM requirements and UK Building Regulations. These accreditations ensure compliance with applicable laws and regulations, as well as encouraging minimal environmental impact during the process of design and manufacture of our products.

CASE STUDIES

CREATIVE SOLUTION PARTNER

Competent and cost-effective, Vitra is a highly sought after solution partner for architects, engineers and developers involved in prestigious projects across the world.

Heathrow Airport – Terminal 5
Location: London, U.K.
Architect: Richard Rogers
Contractor: Mansell

Serving 30 million passengers a year, Heathrow Terminal 5 is the busiest of all BAA's terminals. Terminal 5 is intended to reinforce Heathrow's position as Europe's principal intercontinental hub.

With over 50 WC facilities throughout the terminal, all needing to meet strict design, accessibility and durability criteria, a new approach to the washroom specification was required. T5's accessibility strategy demanded that all washroom facilities should not only meet but surpass the current Part M Regulations and Design Disabilities Act. BAA Design approached Vitra to create a bespoke product that would fully meet their requirements.

Park Plaza Westminster
Location: London, U.K.
Pod Manufacturer: E. J. Badeskabiner
Investor: Galliard-Homes Company

Park Plaza Westminster Bridge is an opulent, luxurious hotel situated directly opposite one of the capital's largest tube and rail transport hubs, occupying a commanding location with unrestricted views over the Thames, Big Ben and The Houses of Parliament. Park Plaza Hotels & Resorts are part of Carlson Hotels Worldwide, the world's ninth largest hotel company.

Park Plaza Westminster Bridge features spacious guest rooms and over 500 studio rooms with extensive leisure facilities, such as concept restaurants, bars and an on-site fitness centre. Other facilities include one of London's largest conference rooms, business lounges, executive meeting rooms, a ballroom and indoor pool.

BLUE LIFE

A PLEDGE TO THE FUTURE

Blue Life is the production approach, design, attitude and management outlook of all Eczacıbaşı Building Products Division brands including Vitra.

Blue Life

For our blue planet...

- Blue Life means reducing the use of non-renewable resources in the production process.
- Blue Life means making significant investments towards boosting eco-efficiency.
- Blue Life means developing products that promote power and resource conservation at the end-user level driven by a concern for the environment and for our collective future.
- We believe managing the future requires efficient management of our resources today; good design also means taking responsibility for resource conservation.

YOUR CONTRIBUTION TO SAVING WATER

VitrA's products are developed and designed in line with our Blue Life philosophy and reflect our commitment to preserving and recycling natural resources.

All VitrA wall-hung frames are equipped with fill valves and by adjusting the gauge it is possible to operate the cistern with 2.5/4 litre or 3/6 litre flow performance.

IF 250 WC PANS WERE CHANGED FROM A 9 LITRE TO A 2.5/4 LITRE CISTERN, ENOUGH WATER WOULD BE SAVED TO FILL 3 OLYMPIC SIZED SWIMMING POOLS

INSTALL & SPECIFY WITH CONFIDENCE

PRACTICAL AND ESSENTIAL FEATURES

Cisterns, pipes, u-bends and other unsightly components become invisible with the use of a concealed cistern and frame. The benefits are not just aesthetic, here are some practical reasons for choosing a Vitra wall-hung WC and concealed solution.

HYGIENIC:

Keeping a bathroom clean and hygienic is made easier with wall-hung sanitaryware. All unsightly pipe work, a haven for dirt and dust, is hidden behind the wall and the WC is lifted from the floor, providing a smoother and easier cleaning area.

SILENT:

The special fill valve located inside the concealed cistern is silent filling. The cistern is covered with styrofoam to provide extra soundproofing.

ACCESSIBLE MAINTENANCE:

The flush plate can easily be removed, providing ready access to internal fittings. Flush plates have a 5-year guarantee.

SPACE-SAVING:

A wall-hung WC solution takes up less room than a conventional WC, and the concealed installation offers flexibility in confined spaces. The range of compact WCs have a shorter projection, saving even more space.

PRACTICAL AND QUICK INSTALLATION:

Installation of the wall-hung frame is quick and easy because of its intuitive design, especially advantageous for multiple installations.

WATER SAVING:

Vitra water saving WCs, marked with this symbol, have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litres) and normal (3/6 litres) water volumes.

By using less water, whilst still delivering efficient flushing, these water saving WCs benefit you and the environment. All Vitra's wall-hung frames come with dual flush function as standard in both 2.5/4 litre and 3/6 litre options.

QUALITY & ASSURANCE

100% RELIABILITY AND PERFORMANCE

VitrA's wall-hung frames are subjected to rigorous reliability and performance testing at VitrA's production facilities.

OVERFLOW TESTING:

The overflow pipe located within the valve is the product's safety device. The pipe's performance is tested according to the standards of water flow.

STRENGTH AND STABILITY:

Concealed frames and wall-hung WC pans have been designed to support weights of up to 400kg.

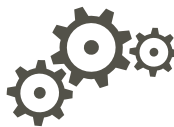

LEAK DETECTION TESTING:

We test each and every cistern individually to ensure that it is 100% watertight.

FLOW RATE TESTING:

The amount of water used during flushing is pre-determined to meet industry standards. If the cistern is not flushed at the required flow rate, the WC pan may not be cleaned properly. As a result, the products must pass a quality control test according to the flow rate (2 litres per second) set by international standards.

PERFORMANCE TEST:

All products are subjected to rigorous performance testing at VitrA's production facilities. Products are tested to ensure that they operate flawlessly before they can be passed.

LONGEVITY TEST:

Our products are periodically tested for longevity according to international standards. Not one of the product's components demonstrated a drop in performance after being consecutively tested 200,000 times.

SPECIFIC DESIGN FEATURES

9 INTERMEDIARY HOSE

The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, which enables easy replacement of parts.

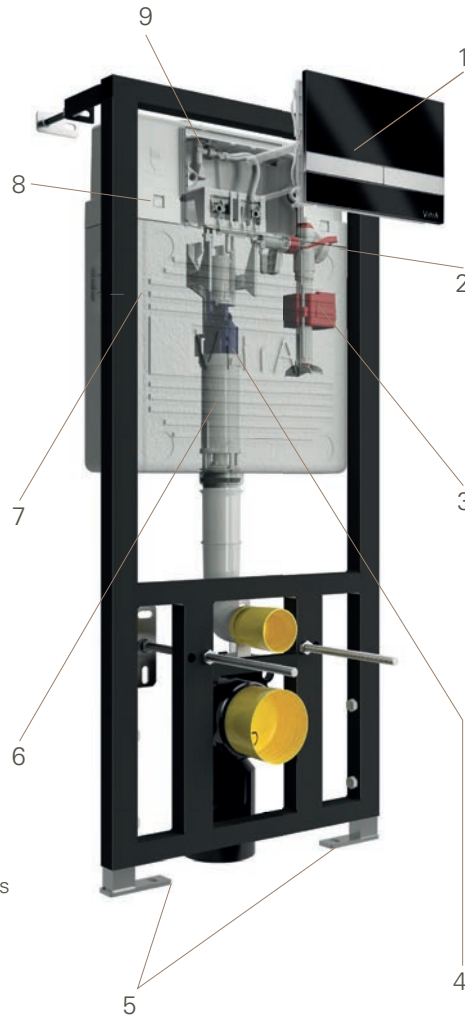

1 CONTROL PANEL

The control panel operates the cistern. It enables easy operation of the concealed cistern and covers internal parts that remain in the wall.

8 PANEL GAP

The panel gap on the body is designed to provide optimum opening space for maintenance of filling or flushing units, enabling easy access to the cistern. The size of this gap is very important for servicing purposes.

2 BODY

The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.

7 BODY STYROFOAM

The Styrofoam that coats the entire lower body prevents condensation in the cistern and ensures sound insulation.

3 FILLING VALVE

The filling valve is the system that fills the cistern with water. The filling valve is checked in Vitra labs for "water-tightness" via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New Vitra filling systems ensure fast and silent filling.

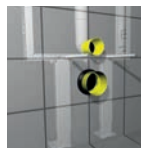

6 FLUSHING VALVE

The flushing valve transfers the water in the cistern to the WC pan for flushing. For correct and reliable functioning, flushing units are subjected to 200,000 water-tightness and accelerated life tests at the factory.

5 METAL STAND

Metal stands enable easy adjustment of height from the floor and secure fixing.

4 OVERFLOW PIPE

The overflow pipe in the flushing mechanism takes the safety duty in concealed cisterns. When too much water enters the cistern, the overflow pipe channels the excess water into the WC pan, preventing the risk of flooding.

Image for illustration purpose only (regular frame)

WALL-HUNG FRAMES

Hidden behind the wall, VitrA's frame systems are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in position.

VitrA's frames give designers complete freedom to create a stunning room without expensive structural building work.

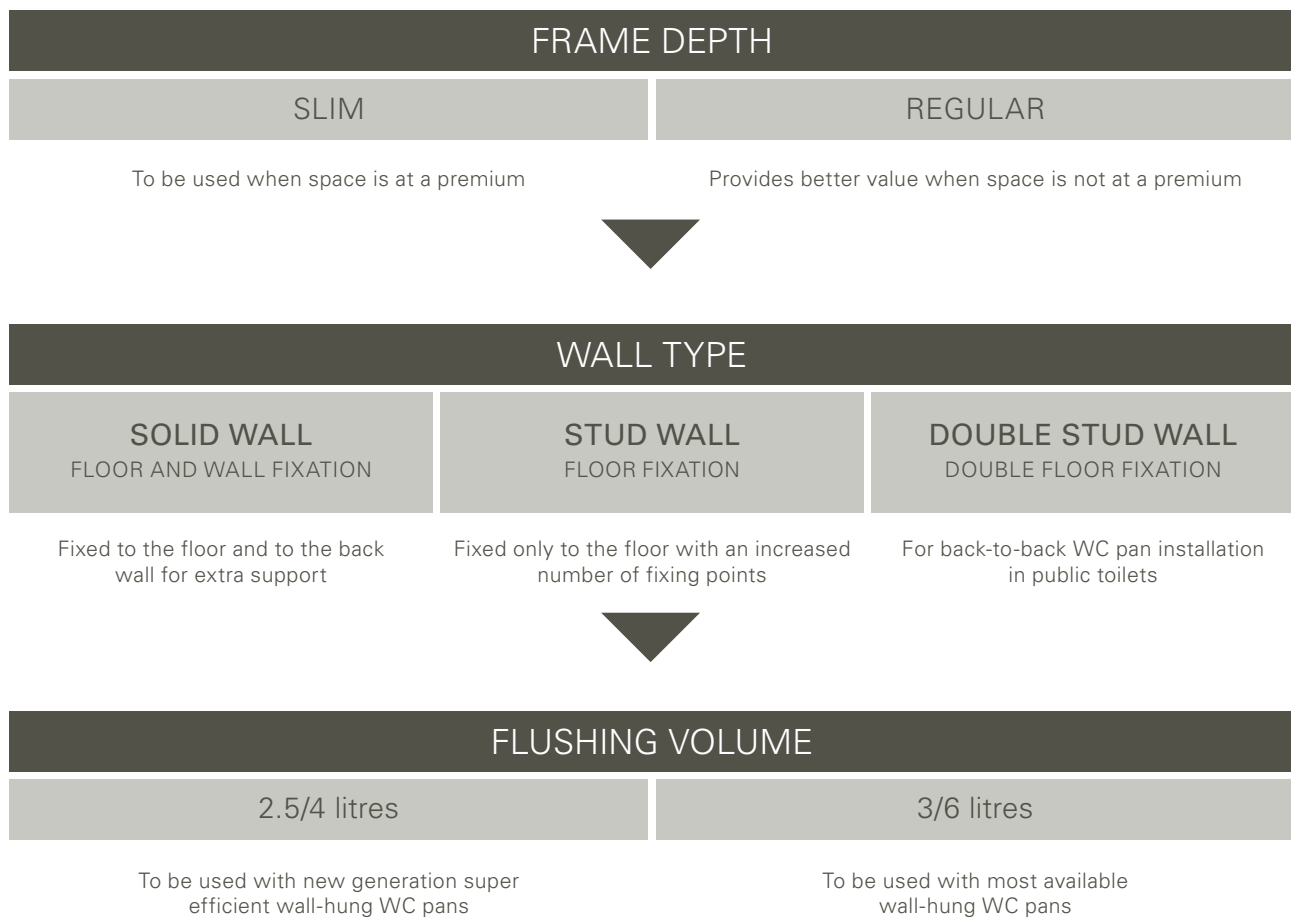

WALL-HUNG FRAMES

WALL-HUNG FRAMES

Whatever your project needs, the range of VitrA wall-hung frames offers you complete flexibility.

Both the slim and regular sized frames can be used in solid wall, stud wall and double stud wall scenarios, and are all available with a choice of flushing volumes.

The slimline frame is perfect when space is at a premium.

VitrA

FLUSH PLATES

With a VitrA wall-hung frame, only the flush plate is visible; two buttons that release either a large or small quantity of water.

VitrA offers a wide range of design solutions, with different finishes and shapes, giving you the freedom to create the bathroom you've always wanted.

Most VitrA flush plate designs feature an anti-fingerprint finish. This finish is extra hygienic, as it is easier to clean and protects against bacteria.

FLUSH PLATES

VitrA's flush plate designs have been developed with individuality in mind.

For this reason, whether it's a mechanical, pneumatic or electronic panel system required, VitrA has a flush plate and frame to suit.

WALL-HUNG WCs

VitrA's wall-hung WCs are perfect for an uncluttered, minimalist look within your bathroom. Wall-hung WCs are raised from the floor, enabling easier cleaning.

Wall-hung WCs create an illusion of a larger bathroom thanks to the increased floor space.

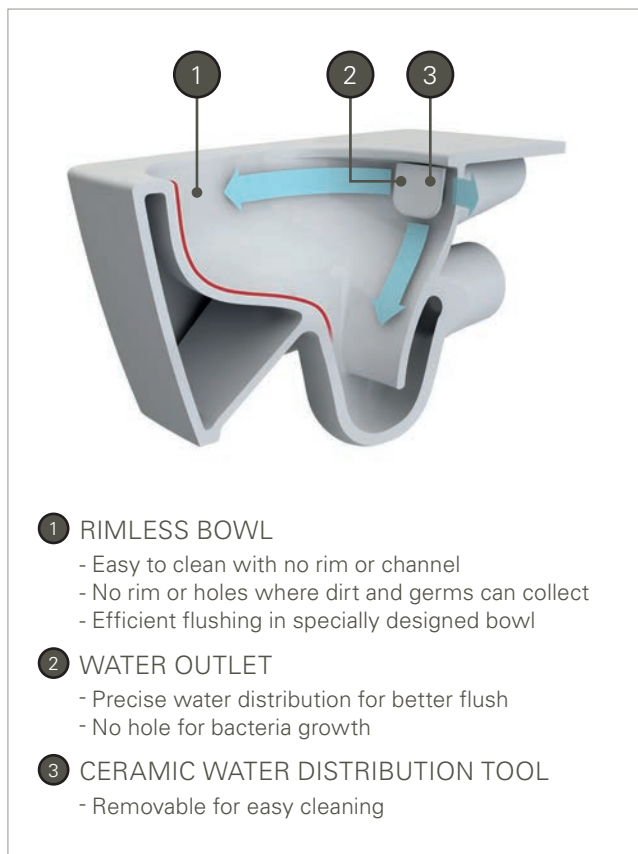

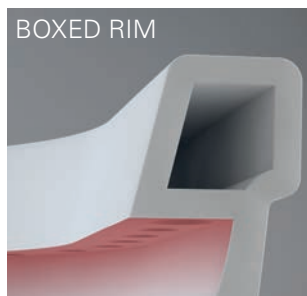

EFFORTLESS CLEANING AND INNOVATIVE, HYGIENIC DESIGN

Effortless cleaning and innovative, hygienic design. Vitra's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

- Easy cleaning
- No rim or holes for germs to collect
- 95% more hygienic than standard WC pans*

*Tests undertaken by the Akdeniz University, Turkey show Vitra RIM-EX WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

V-CARE

V-CARE

V-CARE: THE NEW GENERATION OF SHOWER TOILET FROM VITRA

THE V-CARE'S VERSATILE DESIGN SUITS ALL TYPES OF BATHROOM STYLES

The functionality of a toilet and the cleaning properties of a bidet combine to offer an impressive WC design with increased comfort.

Other than requiring an electrical connection and a second water connection, the procedure for installing a V-care WC is much the same as that of a conventional wall-hung WC.

Depending on whether your bathroom is part of a new construction or renovation, you may need to add these connections to the area where the V-care WC is going to be mounted. The V-care WC has been intelligently designed so that the connections will not be visible.

EASY TO CLEAN WC

Due to the rimless design of the inner bowl and hidden “V-Fit” installation technology, the V-care WC is very easy to clean.

- Rim-Ex technology eliminates the rim inside the WC, enabling cleaning of the inner bowl with one single wipe.
- “V-Fit” installation technology means that the side of the WC has a completely smooth surface, enabling easy cleaning.

ENERGY-SAVING FUNCTION

There are three modes for usage:

1. Standard
2. Energy-saving
3. Stand-by

SPACE-SAVING

V-care combines the functions of a regular toilet and a bidet, saving the space needed for a bidet in the bathroom.

All washing and drying options are controlled by the remote

MORE COMFORTABLE

V-care offers water, seat and drying temperature adjustments. In addition, water pressure can be adjusted to ensure maximum comfort.

VITRA FRESH

WC PAN WITH LIQUID CLEANING TANK PROVIDES MAXIMUM HYGIENE AND A FRESH SCENT WITH EVERY FLUSH

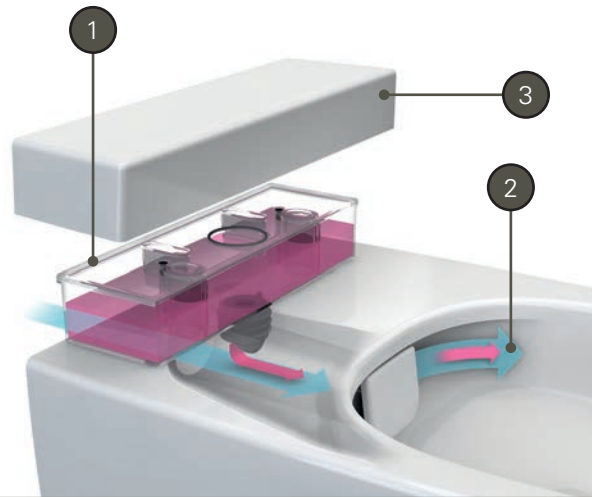

Vitra Fresh WC pans incorporate a tank into the design of the pan that dispenses detergent with every flush, helping to clean the pan thoroughly and protect from the build-up of bacteria.

It eliminates the problem of corrosion to the flushing mechanism caused by adding cleaning agents to the cistern. Vitra Fresh is currently only available in the M-Line range.

- 1 The detergent tank sits on top of the WC pan and stores and mixes liquid detergent* with flushing water for maximum hygiene

*The liquid detergent dispenser is safe to use with most commercially available non-abrasive toilet cleaning liquids which include hypochlorous cleaning agents and bleach of up to 12.5 pH.

- 2 Vitra Fresh not only emits the pleasant scent of your detergent but provides superior hygiene and sanitation with every flush
- 3 The removable lid enables easy cleaning and refill
