ICON GUIDE

WATER SAVING

WCs marked with this symbol have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes.

By using less water, these water saving WCs benefit you and the environment. All Vitra standard height wall-hung frames come with dual flush function as standard in both 2.5/4 litre and 3/6 litre options.

SPACE SAVING

A wall-hung WC takes up less room than a conventional WC, and the concealed installation offers flexibility in confined spaces. The range of compact WCs have shorter projection, saving even more space.

ACCESSIBLE

These products are wheelchair accessible and provide enhanced convenience in the bathroom.

RIM-EX TECHNOLOGY

Offering effortless cleaning and innovative, hygienic design. Vitra's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

WRAS

The purpose of WRAS is to contribute to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

WASHBASIN FORMS

Washbasins can be used with a pedestal as well as being wall-hung. Basins suitable for use with a counter top can be fitted in three alternative ways:

FISCHER

A simple, elegant installation system for use with wall-hung WCs. The fixings are hidden from sight by the use of internal ABS sleeves, creating a clean, smooth design.

THE ESSENCE OF VITRA

VitrA bathroom products are designed to combine beauty with practicality, offering the very best in comfort, storage and ease of maintenance.

PHILOSOPHY: IT'S ALL ABOUT INSPIRATION

VitrA's quest is to create beautiful, inspiring bathroom environments, and to change our perception of the bathroom from that of a purely functional space into something much more, turning an essential, everyday experience into something beautiful, relaxing and life-enriching.

DESIGN EXCELLENCE RECOGNISED

The superior design, quality and innovation behind VitrA's products has been acknowledged by some of the world's most prestigious design awards.

INSPIRED APPROACH TO DESIGN

In addition to our own highly-accomplished in-house design team, we also collaborate closely with a world-class team of independent designers, each with their own creative instinct and flair for bathroom aesthetics and functionality.

INTERNATIONAL RECOGNITION

Our strong relationships with designers around the world have enabled us to push the creative boundaries of bathroom design. A key example of this is our collaborative work with German design studio NOA, which resulted in the highly popular T4 and M-Line collections.

Our award-winning design stems from a creative, collaborative approach

This global pool of exceptional design talent has resulted in Vitra being awarded many accolades, including the Wallpaper Design Award for Best Bathroom, an Elle Décor Award, Good Design Award, Red Dot Design Award and no fewer than two iF product design awards for excellence in product and design quality in 2014.

In 2016, the V-care shower toilet product was awarded four Plus X seals of approval and the 'Best in Class' award in its product category. In 2017, the Eternity range of accessories won a Designer award for most innovative use of materials.

In 2018, Vitra Design Team won further iF awards for the popular Sento furniture range, Frame monoblock basins and Suit brassware.

Vitra has received a number of 'iF product design awards' for **excellence in product and design quality**

THE ESSENCE OF VITRA

**ROSS
LOVEGROVE**

One of the most fascinating designers of the 21st century and recipient of countless awards, Ross Lovegrove creates sculptural and organic shapes using sophisticated technology and materials. His design concept 'organic essentialism' is inspired by elements from the natural world which are then reshaped into futuristic forms, beautifully portrayed in the Istanbul range.

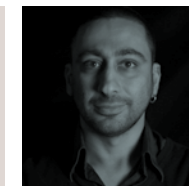

**MATTEO THUN
& PARTNERS**

Milan-based Matteo Thun & Partners is a studio of architecture, design and communication that refuses to be categorised in stylistic terms. The Water Jewels range including the metallic finish basins bring a sense of dramatic and endless originality.

NOA

The German design studio NOA specialises in designing new products, technologies and communication strategies. NOA's fruitful collaboration with Vitra has created many ranges including the M-Line and T4 collections.

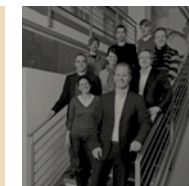

VITRA DESIGN TEAM

Led by Erdem Akan, the in-house team of designers represent the backbone of our design philosophy and culture. They are supported by the multi-disciplinary teams at the Vitra Innovation Centre. The hallmark of the Vitra collections are innovative designs based on sustainability, 'design for all' principles underpinned by sophisticated technology.

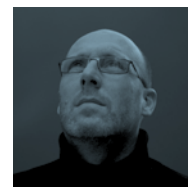

**PENTAGON
DESIGN**

Pentagon Design is an award winning design studio based in Finland. The popular Nest and Nest Trendy ranges are a perfect example of their commitment to meeting the needs of the consumer. The result is the development of product ideas and strategies that engage the user and the architectural space.

INDEED

As Europe's leading company for holistic design and brand innovations, Indeed creates compelling designs and powerful brand experiences. Vitra's high-tech and sophisticated T4 brassware collection was developed by Indeed.

**CHRISTOPHE
PILLET**

Based in France, Christophe Pillet's name is synonymous with stylish, functional and natural design – the lightness of touch in his work is elegance epitomised. His perfect command of sensuality and refinement has made him one of the most renowned French designers to have gained global recognition. The Memoria range is one example of his commitment to creating beautiful, elegant bathroom products.

**SEBASTIAN
CONRAN**

With design in his blood, Sebastian has been designing stylish and innovative homeware for over 40 years. Based in his West London studio-workshop, he is intimately involved in all aspects of the design process; sharing his discerning eye, wealth of experience and manufacturing expertise in his collaboration with Vitra. The Eternity accessory range by Sebastian Conran incorporates the use of teak wood, chrome and soft gold finishes to create a range as beautiful in form as it is in function.

EVOLUTION OF THE VITRA BRAND

Süleyman Ferit Bey, Dr. Nejat Eczacıbaşı's father, is given the title of "Eczacıbaşı".

Dr. Nejat Eczacıbaşı establishes a pharmaceutical laboratory in Istanbul. His first product is a vitamin capsule.

1909

1912

1941

1952

1958

1966

1977

1979

Süleyman Ferit Bey buys the Sifa Pharmacy in Izmir and begins producing toothpaste, lotions and creams.

Eczacıbaşı inaugurates the first Turkish modern pharmaceutical plant in Istanbul.

Eczacıbaşı opens Turkey's first production plant for ceramic sanitaryware.

The Vitra brand was first adopted.

The group opened its first brassware plant within its Bozüyük mega complex.

The Eczacıbaşı Group's first ceramic factory in Bozüyük began production (over time this grew to become the Bozüyük mega complex).

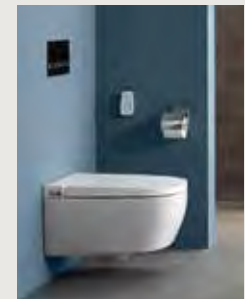

Production of acrylic bathtubs and ceramic tiles began at the Tuzla plant.

Vitra opens its first sales and marketing offices outside of Turkey. Vitra Bad (Germany) and Vitra UK Ltd.

Start of a \$45.4m investment in the production plant at the Bozüyük complex to increase capacity by a further 20%.

V-care is launched – the new generation of shower toilet.

TODAY

The first ceramic sanitaryware exports began.

Eczacıbaşı invests in a second sanitaryware and ceramic tiles production line at the Bozüyük Building Products Complex. With this investment, Vitra has one of the world's largest ceramic sanitaryware production facilities.

Vitra is an international brand, producing 6 million pieces of sanitaryware per year and exporting to 75 countries worldwide. Sento, Frame and Suit win iF Design Awards.

Istanbul range receives the Design Classic award by Pro Publishing.

A HISTORY OF INGENUITY

VitrA's rich heritage can be traced back to 1909, when renowned Turkish pharmacist Süleyman Ferit Eczacıbaşı began producing bathing and cologne products at his pharmacy in Izmir.

The business continued to grow steadily, and by 1952 he had opened Turkey's first modern pharmaceutical plant.

Three decades later, his son, Dr Nejat Eczacıbaşı, took the family business a step further by establishing a pharmaceutical laboratory in Istanbul. The business continued to grow steadily, and by 1952 he had opened Turkey's first modern pharmaceutical plant. Within a few years, Eczacıbaşı's vision had grown further still, and with the establishment of Turkey's first ceramic sanitaryware plant in 1958, Vitra was born.

INNOVATION AND CREATIVITY

VitrA's Innovation Centre – where all the magic happens, from the conception, development and realisation of original ideas and designs, to the innovation, planning and production of new technology and materials.

Here, architects and designers are encouraged to free their imaginations and original ideas are showcased in a setting that blends culture, art and lifestyle. It's this commitment to

innovation and creativity, to constantly improve comfort, sustainability and bathroom aesthetics, that is helping us transform the traditional concept of the bathroom.

CERAFINE

A ceramic based formula enabling the creation of basin designs with thin, defined edges and organic shapes. The Outline range can be found on page 40.

METALLIC FINISH

Water Jewels is a unique range of basins designed by Matteo Thun for Vitra, see the full collection on page 44.

Physical Vapor Deposition (PVD) is a state-of-the-art manufacturing process in which metal powders are vaporised and deposited onto a surface.

The metallic coating presents a striking visual and remains corrosion and scratch resistant. The range is available in gold, copper and platinum as well as the traditional white ceramic.

BEAUTIFUL, THIN
PROFILE EDGES.
SEE AND FEEL
THE DIFFERENCE
WITH VITRA INFINIT

VITRA INFINIT

Bathroom products made from mineral cast are distinguishable by the thinner profile edges and clean lines.

A material manufactured by using a combination of natural stone powder and a polyester resin, mineral cast produces a beautiful finish which is warm to the touch and easy to clean, it can also be used to create basins in a wide range of shapes and sizes.

Mineral cast is a hard-wearing material with the added benefit of being invisibly repairable in the unlikely event of the basin becoming damaged.

VITRA CLEAN

Vitra Clean is a surface finish that makes Vitra sanitaryware products incredibly easy to care for.

This special glazing process increases surface tension so the water flows easily from the surface. All that's needed to keep the basins clean is a wipe with a damp cloth and the use of a mild cleanser, making cleaning easier and helping to keep your bathroom looking its best. Vitra Clean finish is on a variety of basins including the new Outline range.

INNOVATION

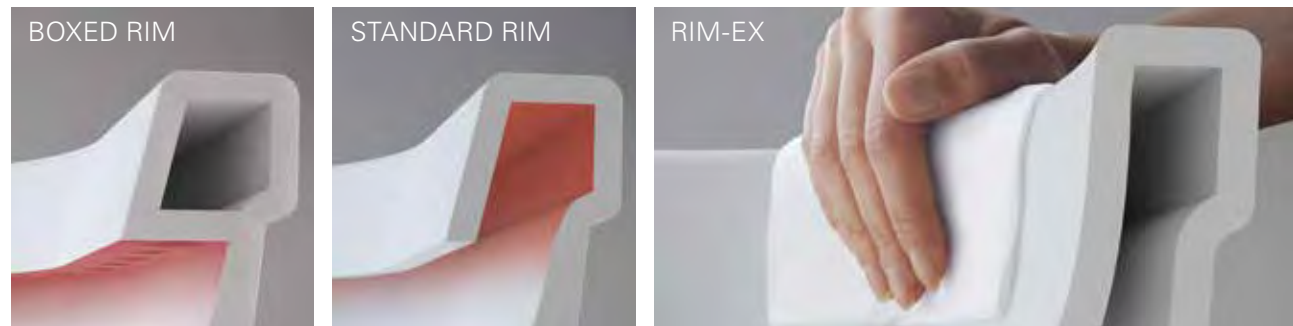

VITRA RIM-EX™

VitrA's rimless WC pan technology removes one of the most unhygienic aspects of traditional WC design, where hard-to-clean rims can harbour germs and allow them to multiply unchecked.

The unique design of our Rim-ex pans incorporates a water diverter to direct the flush around the bowl, which can be removed easily for cleaning. Rim-ex is 95% more hygienic than standard WC pans.*

*Tests undertaken by the Akdeniz University, Turkey show VitrA Rim-ex WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

The redesigned bowl features a smooth, channel-free design to discourage germ reproduction and provide superior hygiene

THE RIM-EX RANGE

The Rim-ex range includes shapes and styles to match any bathroom design.

ISTANBUL PAGE 24 MEMORIA PAGE 30 T4 PAGE 54 M-LINE PAGE 60 NEST PAGE 74 SENTO PAGE 86

INNOVATION

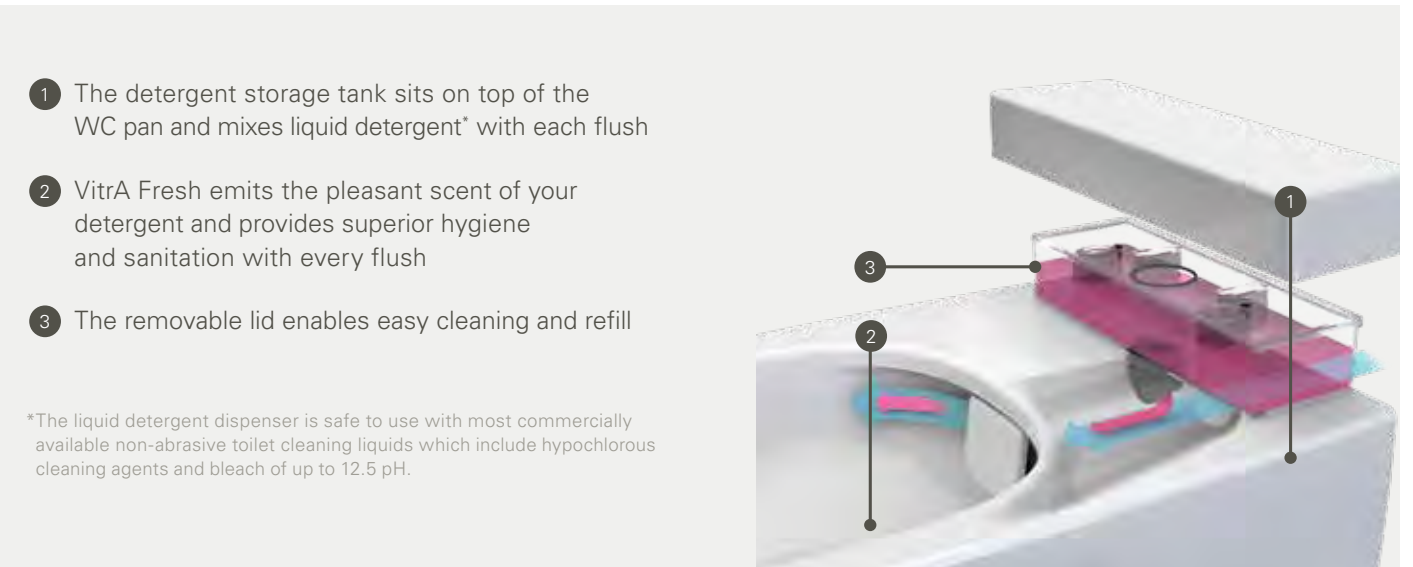

VITRA FRESH

VitrA Fresh WC pans feature an integral tank that dispenses detergent with every flush, helping to clean the pan thoroughly and protect against the build-up of bacteria.

VitrA Fresh prevents the need to add cleaning agents to the cistern, which can corrode the flushing mechanism. VitrA Fresh is currently only available in WCs in the M-Line series.

- 1 RIMLESS BOWL**
 - Easy-to-clean with no rim or channel for germs to collect
 - Efficient flushing in specially designed bowl
- 2 WATER DISTRIBUTION TOOL**
 - Specially engineered water diverter
 - Removable for easy cleaning
 - Flushes to 65mm from the top of the pan for added cleaning

- 1** The detergent storage tank sits on top of the WC pan and mixes liquid detergent* with each flush
- 2** VitrA Fresh emits the pleasant scent of your detergent and provides superior hygiene and sanitation with every flush
- 3** The removable lid enables easy cleaning and refill

*The liquid detergent dispenser is safe to use with most commercially available non-abrasive toilet cleaning liquids which include hypochlorous cleaning agents and bleach of up to 12.5 pH.

FISCHER

This system enables wall-hung pans to be positioned onto the bolts in the wall and secured using an allen key from underneath, or through the holes for the seat.

This makes installation quick, easy and delivers a more aesthetically pleasing appearance. Cleaning is easier as there are no external fittings that can attract dust.

Right: M-Line wall-hung WC with VitrA Fresh, Rim-ex 7672, £410

Blue Life

For our blue planet...

Blue Life is the production approach, design, attitude and management outlook of all Eczacıbaşı Building Products Division brands including Vitra.

BLUE LIFE

A PLEDGE TO THE FUTURE

- Blue Life means reducing the use of non-renewable resources in the production process.
- Blue Life means developing products that promote power and resource conservation at the end-user level driven by a concern for the environment and for our collective future.
- Blue Life means making significant investments towards boosting eco-efficiency.
- Vitra believe managing the future requires efficient management of our resources today; good design also means taking responsibility for resource conservation.

PRODUCT CERTIFICATES

PRODUCTION CERTIFICATES

ISO 9001 Quality Certification / ISO 14001 Environmental Certificate / ISO 50001 Energy Management System Certificate / OHSAS 18001 Occupational Health and Safety Management System Certificate

BLUE LIFE

The manufacturing plants are equipped with specifically designed recycling systems to reduce raw material and power consumption.

Under the guidance of effective waste treatment methods implemented by the Eczacıbaşı Building Products Division, in 2017 optimal purifying technologies were developed to recover water. Today Vitra, part of the Building Products Division, consume 35% less water of production output.

Temperatures of the ceramic kilns were also readjusted in the Vitra plant, reducing energy consumption by 15%.

The same responsibility for natural resource conservation guides the group in the development of products for both residential and public use. So you know choosing a Vitra product means you are contributing to saving the worlds natural resources.

For example, the 2.5/4 litre WC pan has been certified by the German LGA Institute and reduces water use by up to 60% compared to the single flush.

With Vitra's brassware equipped with an adjusting pin, special ceramic cartridges can be set to limit the amount of water released creating savings of up to 60%.

Finally, thermostatic bathtubs and shower mixers save water and power by eliminating the need to adjust hot and cold water until the desired temperature is achieved, ensuring reliable water flow temperatures.

YOUR CONTRIBUTION TO SAVING WATER

Vitra's products are developed and designed in line with our Blue Life philosophy, and reflect our commitment to preserving and recycling natural resources.

WATER SAVING

All Vitra concealed cisterns are equipped with fill valves and by adjusting the gauge, it is possible to operate the cistern with 2.5/4 litre or 3/6 litre flow performance.

WRAS

Vitra products with WRAS approval mean they comply with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

If 250 WC pans were changed from a 9 litre to a 2.5/4 litre cistern, enough water would be saved to fill three olympic-sized swimming pools

V-CARE

NOA

A multi-award winning German design studio, NOA blends precise, cutting-edge engineering with ingenious creativity to meet contemporary needs – functionality, interaction and aesthetic value.

When you feel fresh and clean, it gives you the confidence to take on the demands of the day. Using water to clean yourself after the toilet is becoming more popular as people understand and experience that feeling of complete freshness and cleanliness.

Introducing V-care WC, the new generation of shower toilet from Vitra, redefining the standard by combining the functionality of a toilet and the cleaning properties of a bidet into a stylish WC that can seamlessly integrate into your bathroom.

V-care Comfort model 5674B003-6104, £2059 / **Sirius flush plate*** 740-0480, chrome, £47 / **M-Line Infnit washbasin unit** 58195, 100cm, plum tree, £1533 / **Tall unit right hand hinged** 58203, 40cm, plum tree, £920 / **Mirror cabinet** 63723, 100cm, plum tree, £1039

*Flush plates require a Vitra frame, see page 218. For technical information see page 238

V-CARE

FEATURES

MORE HYGIENIC

V-care offers hands-free WC usage and with the Comfort model the seat cover opens automatically when you approach. You can simply start the integrated shower function with the touch of a button while you sit comfortably on the WC. The washing and drying options are also controlled by the remote.

SIMPLE TO OPERATE

V-care can be used via remote control and has a very simple, intuitive user interface. The basic functions of the WC can also be controlled via the left and right side of the toilet itself.

EASY-TO-CLEAN WC

With no awkward rim to negotiate in the inner bowl and concealed fixings, the V-care WC is very easy-to-clean. Rim-ex technology disposes with the rim inside the WC, enabling cleaning of the inner bowl with a single wipe.

DESIGNED FOR COMFORT

The seat, designed with an ergonomic shape for optimum comfort, comes complete with remote-controlled seat temperature adjustment.

ENERGY-SAVING FUNCTION

Select from three modes:

1. Standard
2. Energy-saving
3. Stand-by

DRYING AND AIR PURIFICATION

After use, the drying function, with adjustable drying temperature, can be selected (Comfort model only).

In both Comfort and Essential models, the air purification is also automatically activated when the user is sat on the WC.

Full details of our V-care WC are available on request or can be found at vitra-vcare.co.uk

ISTANBUL

ROSS LOVEGROVE

The recipient of countless prestigious design awards, Ross Lovegrove is internationally renowned for his ability to create organic, sculptural shapes using sophisticated technology and materials.

Istanbul – a city of great contrasts and diversity, where East meets West, and where Vitra has its roots. Taking inspiration from a rich cultural and architectural heritage, Ross Lovegrove has created a stylish homage to this great city in the form of the most exquisite bathroom design, which like the city itself, has its very own unique identity.

OUTLINE

VITRA DESIGN TEAM

VitrA's team of in-house designers represent the backbone of our design philosophy and culture. These emerging stars are supported by multidisciplinary teams at the VitrA Innovation Centre. The hallmarks of VitrA's collections are innovative design based on sustainability, 'design for all' principles and superior concepts underpinned by sophisticated technology.

Bringing a fresh new look to basin design, the Outline range made from cerafine ceramic with the VitrA Clean glaze offers a choice of both new shapes and finishes. Cerafine is a ceramic based product and by using finer particles in the manufacturing process the basins have thinner and more defined edges. Unique to Outline, VitrA introduce the new pebble shape to this range of countertop basins. The four additional shapes available are TV, oval, square and round.

WATER JEWELS

MATTEO THUN & PARTNERS

A world-renowned, Milan-based studio, headed by the multi-award-winning Matteo Thun, famous as much for outstanding architecture as innovative design.

It's his talent for visualisation of form and space, alongside a deep understanding of the latest materials and technologies available that makes Matteo Thun's bathroom design so original.

The Water Jewels collection offers something truly extra special to those with a taste for the exotic. Matteo Thun's pure forms balance the curved and the linear with an added dimension, thanks to VitrA's own innovative, advanced manufacturing technology. The result is a range that balances space, form and function to quite stunning effect.

VITRA DESIGN TEAM

VitrA's team of in-house designers represent the backbone of our design philosophy and culture. These emerging stars are supported by multidisciplinary teams at the VitrA Innovation Centre. The hallmarks of VitrA's collections are innovative design based on sustainability, 'design for all' principles and superior concepts underpinned by sophisticated technology.

The Frame furniture range offers a distinctive new style to bathroom furniture blending natural matt finishes with wooden louvred drawers to create a beautiful statement bathroom. The furniture is available in three different colour combinations and comes with either a white or taupe vanity basin with soft curved edges. LED lighting in the drawers provides practical lighting in the bathroom. The Frame range also includes a selection of stand alone inset basins available in four different shapes and five finishes, offering flexibility and choice.

NOA

A multi-award winning German design studio, NOA blends precise, cutting-edge engineering with ingenious creativity to meet contemporary needs – functionality, interaction and aesthetic value.

Refined and composed, yet subtly seductive, NOA has created a minimalist range with maximum effect. Perfect geometry, optimal dimensions and rounded corners soften angular forms to create a light, delicate look. The multiple size options and modular designs make this an incredibly flexible range for large and small bathrooms.

DESIGNER COLLECTION

M-LINE

NOA

A multi-award winning German design studio, NOA blends precise, cutting-edge engineering with ingenious creativity to meet contemporary needs – functionality, interaction and aesthetic value.

Developed for superior hygiene, the M-Line series features a range of innovative developments that provide smart, practical solutions. All M-Line washbasins have a specially-designed bowl, with precisely the right combination of depth, shape and incline to promote the maximum flow of water to the waste area. This prevents build-up of residue on the bowl surface making it easier to keep clean. In addition, all M-Line washbasins can be fitted with either a standard metal or ceramic waste cover.

BATHTUBS AND SHOWER TRAYS

Bathing has always been associated with health, well-being and relaxation. Vitra's beautiful range of bathtubs continues to evoke, uphold and enhance these associations. Whatever your preference, be it free-standing or fitted, sweeping line or a calming curve, acrylic or mineral cast, our bathtubs make bathing a sensory pleasure. Our stylish range of free-standing bathtubs will not only relax the body and revitalize the spirit, but also transform your bathroom space to stunning effect.

Vitra bathtubs made from high-grade acrylic produce a superb finish. Each fitted bathtub features a minimum of five adjustable feet, a fully-encapsulated wooden baseboard and frame, and an advanced wall fixing kit to keep the bath tightly in place, ensuring stability with no creaking or bowing.

All Vitra bathtubs carry a 25-year guarantee, and panels come with a 2-year guarantee.

SHOWER SYSTEMS

V-BOX	114
MINIBOX	126
SHOWER SYSTEMS	130
COMPLETE SOLUTIONS	136

The shower is an important element in any bathroom and it is probably one of the hardest working elements of a bathroom design. Shower systems will refresh and revitalise and with the choice of designs, there is a shower system perfect for your bathroom.

The V-Box system is new to Vitra and offers both thermostatic and non thermostatic options in a choice of four different ranges. The minibox system offers non-thermostatic options available in a range of brassware styles.

Concealed behind the wall, these shower systems create a beautiful, contemporary look in any bathroom.

Vitra's shower systems include a collection of hand showers with and without side rails, beautiful showerheads and shower columns all with the design credentials synonymous with the Vitra brand.

To help select the right look for your bathroom, Vitra have introduced five complete shower solutions. Each shower system conveniently brings together every working element needed to create a beautiful showering environment.

SHOWER SYSTEMS – V-BOX

Choosing a shower system is one of the most important aspects of the bathroom design especially given the range of overhead and handshower styles to choose from.

V-BOX

V-Box, by Vitra, is the new generation of standard and thermostatic shower solutions for concealed bath and shower mixers enabling up to three water outlets (bath spout, overhead shower or handshower).

The shower valve (see below) controls the flow of water, similar to the tap on a basin. By concealing the shower valve behind the wall, this creates more space under the shower head making cleaning easier. V-Box can be trimmed down to fit behind the wall. With a minimum wall depth (including wall covering) of 110mm, you do not lose valuable room space with V-Box.

For the visible (exposed) part of the shower solution there is a choice of four styles; each with a full range of matching basin and bath fillers.

V-Box also offers a choice of thermostatic and standard shower valves.

Thermostatic shower valves are designed to maintain the temperature of the water, preventing fluctuations in the water temperature. This is an important consideration for families where extremes in water temperature can be dangerous.

There is also a choice of standard shower valves but these do not regulate the water temperature, so if someone turns on a tap elsewhere in the house the water from the shower may run too hot or too cold.

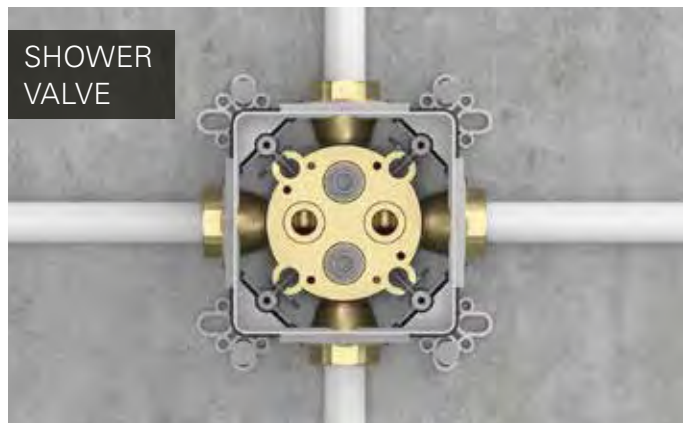

Diverter enable the flow of water to be switched from one outlet to another, for example to the shower head or handshower. V-Box diverters allow for 3-way outlets; bath spout, overhead shower and handshower.

WATER OUTLET OPTIONS

- 1-way:** shower mixer, with adjustable water temperature control
- 2-way:** water can be diverted to two of the following options: showerhead, handshower, bath. Water temperature can be adjusted using one controller. Hot and cold water feed separately into the concealed valve.
- 3-way:** using a diverter the water can be directed to either the bath, shower head or handshower.

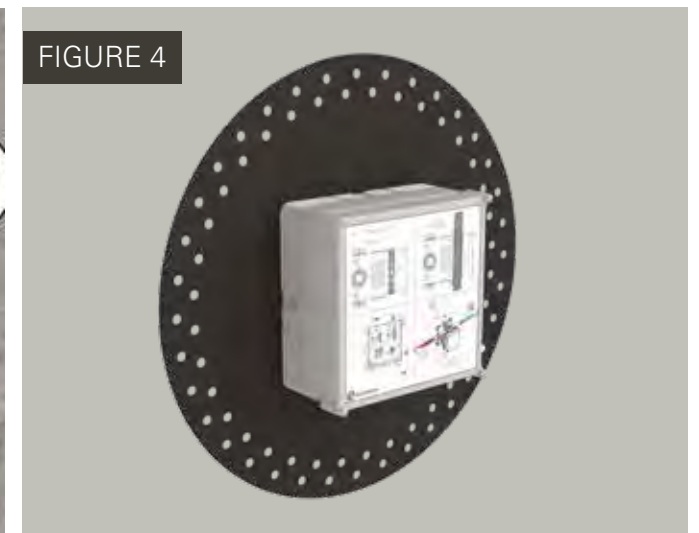

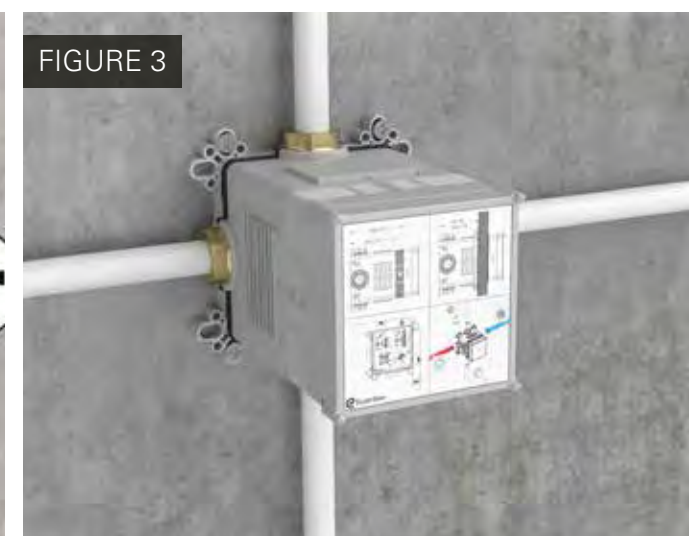

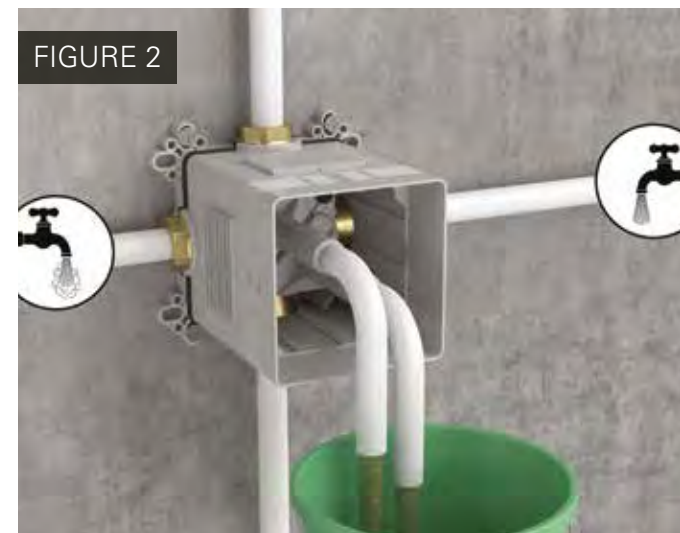

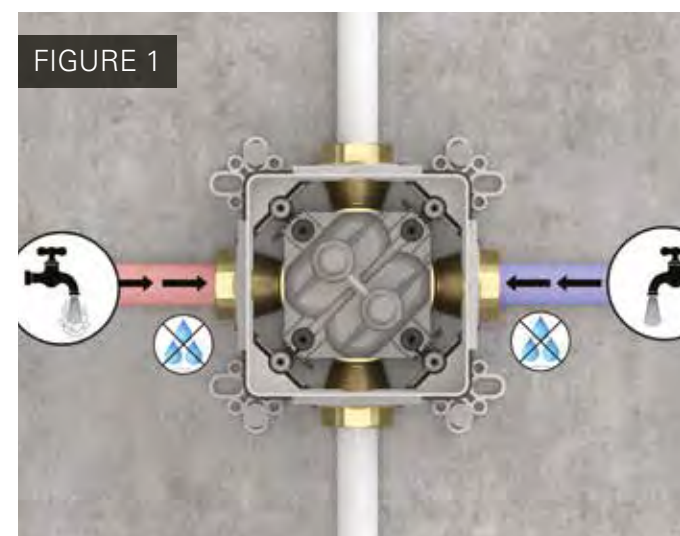

V-BOX OFFERS A CHOICE OF THERMOSTATIC AND STANDARD SHOWER VALVES

SHOWER VALVE

MINIMUM WALL DEPTH OF 110MM NEEDED

SHOWER SYSTEMS – V-BOX

INSTALLATION

FIGURE 1 IMPERMEABILITY TEST

The water inlet pipes are fitted as shown above. This ensures the V-Box is mounted correctly and tightly to prevent leaks. There are also multiple fixing points.

FIGURE 2 CLEANING

After connecting the water feeds the special V-Box design also allows for any debris that may have accumulated from the installation process to be flushed out.

FIGURE 3 GYPSUM PLATE WALL MOUNTING

Once the water inlet pipes are connected and cleaned, the box is fitted to the wall using the multiple fixing points. The special design enables easy mounting on gypsum plate walls.

FIGURE 4 HUMIDITY PROTECTION

To further protect the mechanism from humidity within the bathroom environment an insulating mattress is fitted. Additional sealing cuffs protect the wall from humidity.

CHOOSING THE RIGHT SHOWER SYSTEM WITH V-BOX

Whether you are looking for a square or round contemporary design, there is a range suitable for any bathroom setting.

After the tiling is completed the front of the box is trimmed to the correct depth and the appropriate brassware is then fitted.

V-Box can be used with brassware, enabling one, two or three-way outlets. Within the compatible ranges there are bath mixers and bath/shower mixers (including thermostatic) and diverters. V-Box can be used with Suit, Nest, Minimax S and X-Line exposed parts, providing choice for consumers. All exposed parts, including the handles are made of metal.

BRASSWARE

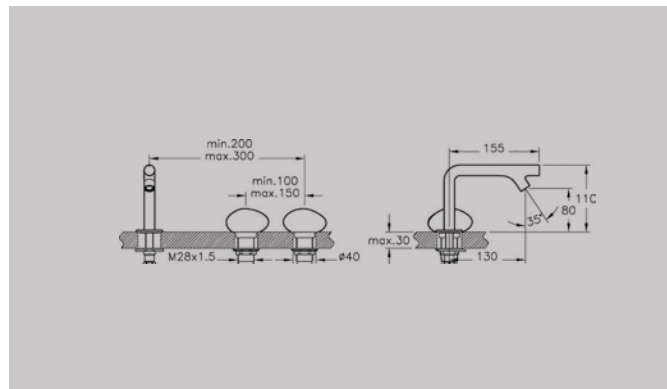

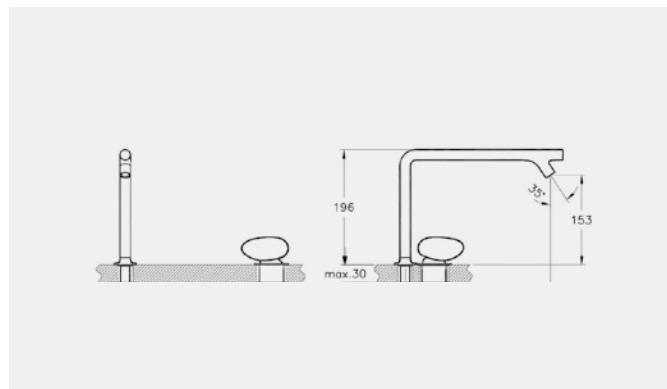

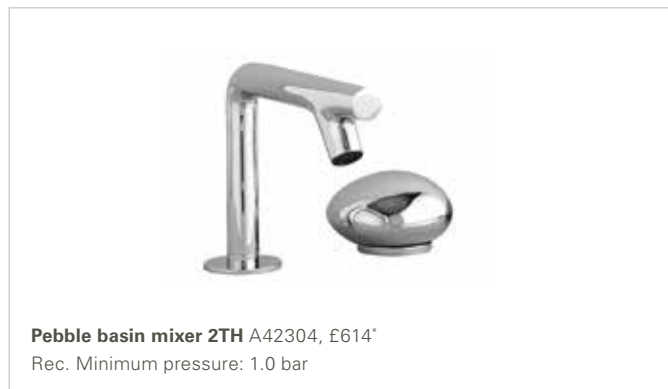

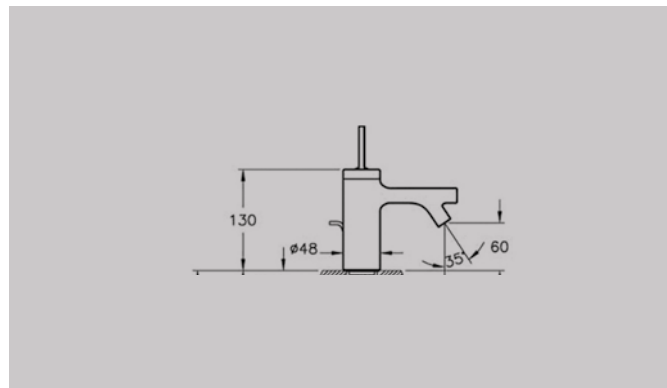

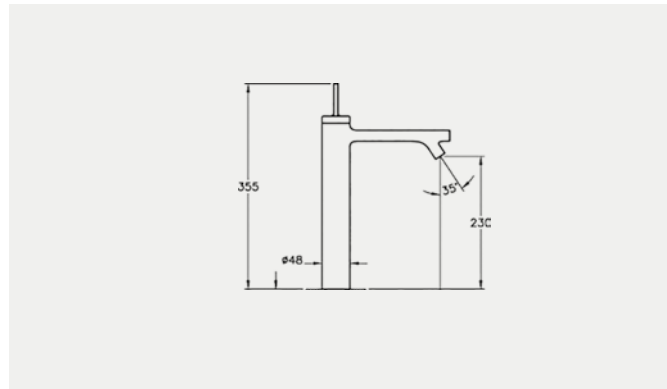

VitrA blends graceful curves with elegant angles to create brassware that is both aesthetically and ergonomically pleasing. Carefully engineered design ensures flow and temperature controls require only the lightest of touches, whether it is for a basin, bathtub or shower system. Every consideration is given to conserving water and energy without compromising the user experience.

Designed and manufactured specifically for the UK market and to meet the requirements of varying UK water pressure, VitrA brassware is incredibly easy to install. The main body of our taps and mixers are made of brass construction, ensuring solid durability, further underpinned by the reassurance of a 10-year guarantee on chrome plating and 1-year guarantee on moving parts.

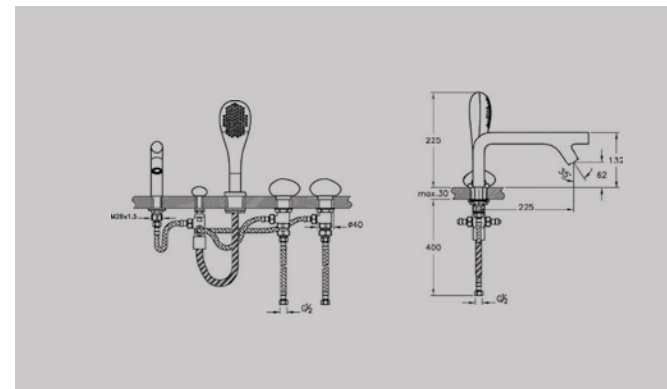

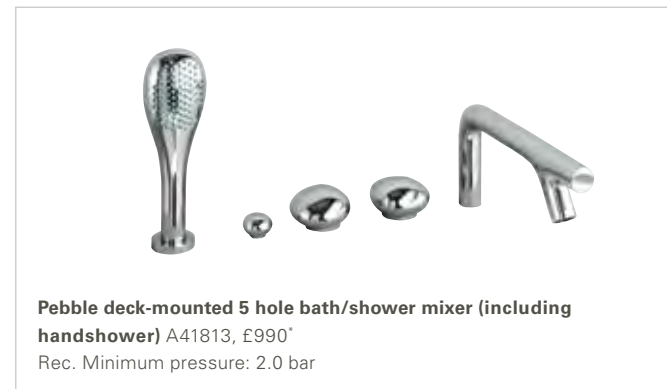

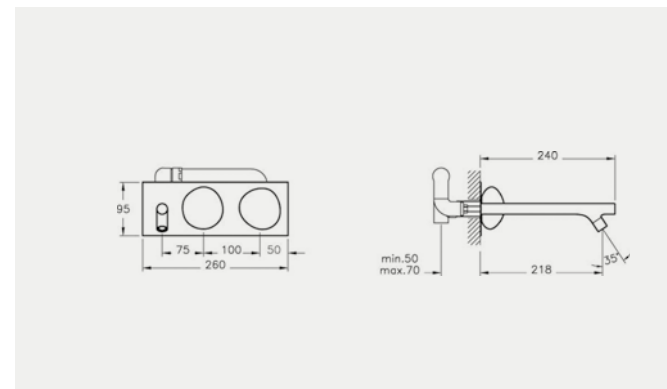

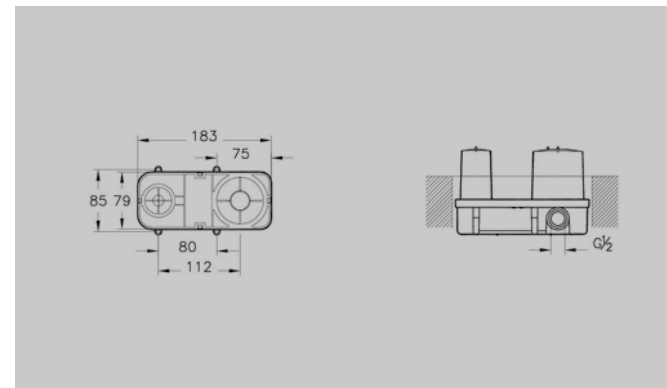

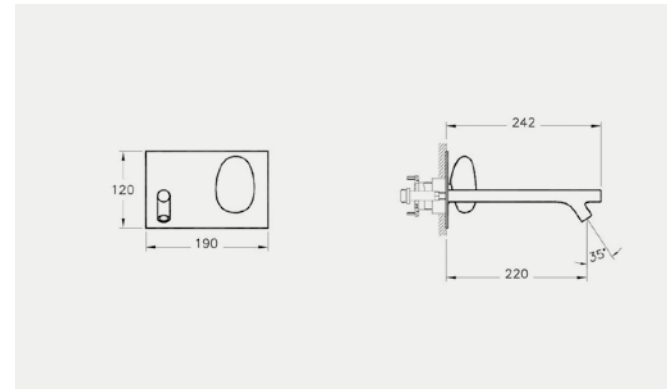

Add the perfect finishing touch to your bathroom with our brassware, designed to complement any bathroom suite.

MIRRORS & SHELVES

A Vitra mirror is the focal point of any bathroom. Our mirrors and mirrored cabinets combine sophisticated design with high quality materials, good craftsmanship and sensible practicality. Most of our mirrors also include integral lighting for a brighter, better-lit bathroom, and there are many options to choose from, whether with lamps or concealed backlighting, to options with shelves and sliding doors. All are easy to install, available in a wide range of sizes from 45cm-150cm, and come with a 2-year guarantee.

WALL-HUNG FRAMES

Concealed behind a solid or stud wall, Vitra's frame systems are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in place. Vitra's frames, available in standard and short height, allow your bathroom designer the freedom to create a stunning room without the need for expensive structural building work.

INSTALL AND SPECIFY WITH CONFIDENCE

Practical and essential for the modern bathroom

The last thing your beautiful bathroom needs is an unsightly mess of cisterns, pipes, u-bends and other functional elements spoiling the look and ambience. Using a wall-hung frame is the answer, and aside from a much tidier look, there are lots of practical benefits too.

HYGIENIC

Keeping a bathroom clean is so much easier with a wall-hung WC. All pipework, usually a haven for dust, is completely concealed, and with the WC pan fixed above the floor, it's so much easier to keep the floor clean.

QUIET

Not only is the cistern concealed behind a wall, but it's also manufactured with a specially-engineered fill valve, and lined with insulating styrofoam to keep filling noise to an absolute minimum.

EASY ACCESS

The flush plate can be removed easily, providing easy access to internal fittings. Flush plates have a 5-year guarantee.

SPACE-SAVING

A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

QUICK & EASY INSTALLATION

An intuitive design makes installation quick and easy – a real advantage, particularly when carrying out multiple installations.

WATER-SAVING

The dual-flush action for both the slim and the regular wall-hung frame operates at 2.5/4 litre or 3/6 litre, resulting in as much as 70% reduced water consumption, benefiting both you and the environment.

WALL-HUNG FRAMES

QUALITY AND ASSURANCE

Rigorous reliability and performance testing

VitrA's wall-hung frames are subjected to rigorous reliability and performance testing at VitrA's production facilities.

OVERFLOW

An overflow pipe located within the valve acts as a safety device. Overflow pipes are tested to ensure they can cope even in high water pressure areas.

STRENGTH & STABILITY

Wall-hung WC pans and their concealed frames are designed to be able to support up to 400kg.

LEAK DETECTION

Every cistern we manufacture is individually tested to ensure it is 100% watertight.

FLOW RATE

Our cisterns undergo quality control testing to ensure that they meet international standards for minimum flush volume and flow rate.

PERFORMANCE

All products are subjected to rigorous testing at our production facilities to ensure that they function perfectly before passing quality control.

DURABILITY

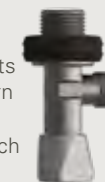

Our products are periodically tested for durability according to international standards. To pass this testing, every single component must still be functioning perfectly after 200,000 consecutive operations.

SPECIFIC DESIGN FEATURES

9 INTERMEDIARY HOSE

The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, which enables easy replacement of parts.

1 FLUSH PLATE

The flush plate operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.

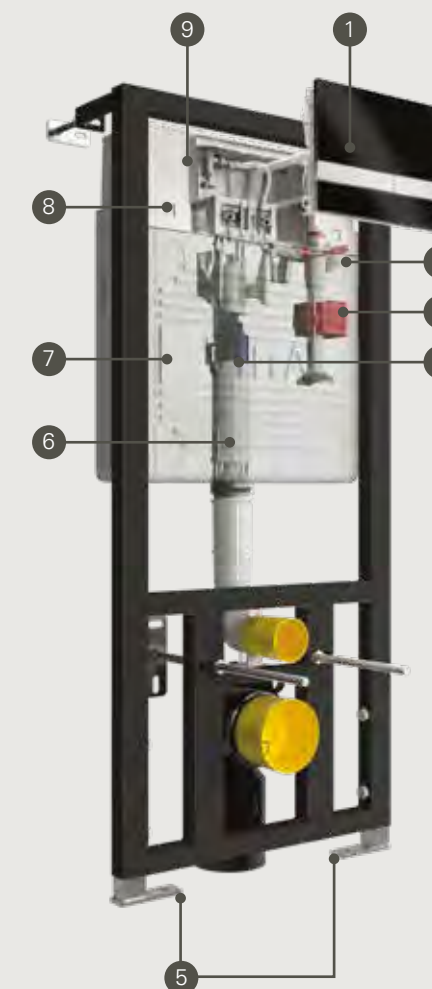

8 PANEL GAP

The panel gap on the body is designed to provide optimum opening space for maintenance of filling or flushing units, enabling easy access to the cistern. The size of this gap is very important for servicing purposes.

2 BODY

The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.

7 BODY STYROFOAM

The Styrofoam that coats the entire lower body prevents condensation in the cistern and ensures sound insulation.

3 FILLING VALVE

The filling valve is the system that fills the cistern with water. The filling valve is checked in Vitra labs for "water-tightness" via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New Vitra filling systems ensure fast and silent filling.

6 FLUSHING VALVE

The flushing valve transfers the water in the cistern to the WC pan for flushing. For correct and reliable functioning, flushing units are subjected to 200,000 water-tightness and accelerated life tests at the factory.

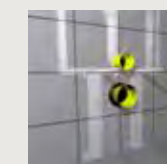

4 OVERFLOW PIPE

The overflow pipe in the flushing mechanism takes the safety duty in wall-hung frames. When too much water enters the cistern, the overflow pipe channels the excess water into the WC pan, preventing the risk of flooding.

5 METAL STAND

Metal stands enable easy adjustment of height from the floor and secure fixing.

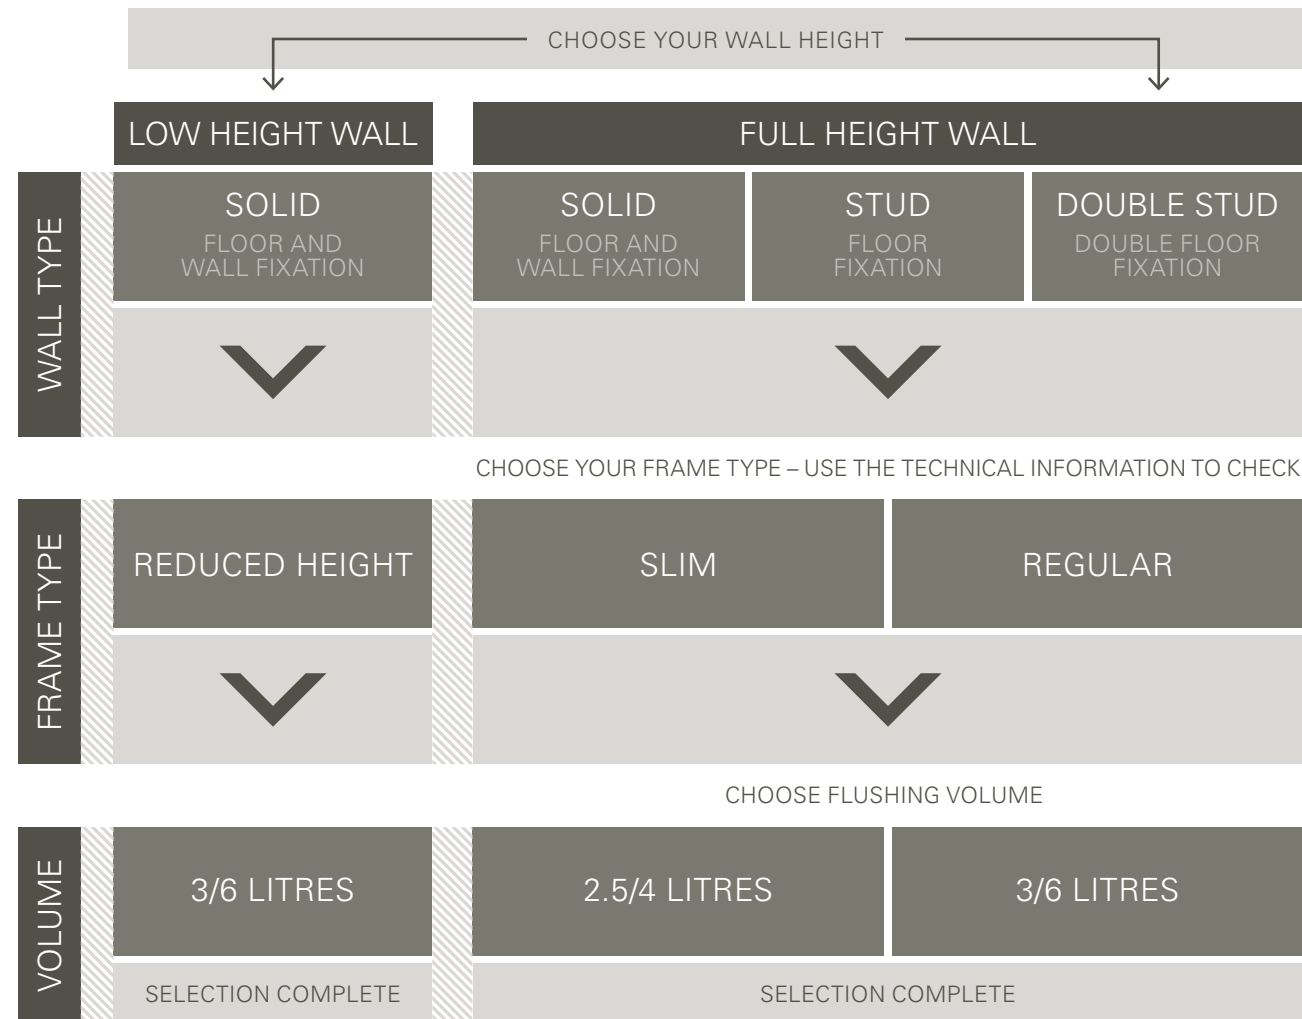

WALL-HUNG FRAMES

FRAMES

Whatever your project needs, the range of Vitra wall-hung frames offers you complete flexibility.

Both the slim and regular sized frames can be used in solid wall, stud wall and double stud wall scenarios, and are all available with a choice of flushing volumes. The slimline frame is perfect when space is at a premium.

WALL-HUNG FRAMES – FLUSH PLATES

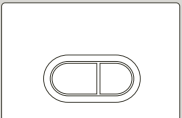

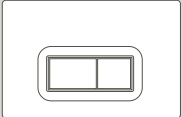

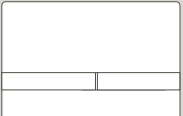

FLUSH PLATES

With a VitrA wall-hung frame, only the flush plate is visible; two buttons that release either a large or small quantity of water.

VitrA offers a wide range of design solutions, with different finishes and shapes, giving you the freedom to create the bathroom you've always wanted.

For this reason, whether it's a mechanical, pneumatic or electronic panel system required, VitrA has a flush plate and frame to suit.

Most VitrA flush plate designs feature an anti-fingerprint finish. This finish is extra hygienic, as it is easier to clean and protects against bacteria.
