KEY FEATURES

1900mm High

Double Rollers

All MBOX enclosures are now 1900mm high as standard.

All rollers on MBOX products are now double quick release for easy cleaning.

Unique Easy Fit System

Align the horizontal and vertical profiles together.

Slot the horizontal profile and screws into upright using guide channel until flush.

Secure screws into position using dedicated access holes.

Extensive Range

This is the biggest and best MBOX range to date with 49 various sizes and shapes available.

5 Inline Panels

MBOX offers Inline Panels that can be used in any space from 650mm to 1900mm.

NEW Sliding Door Size

MBOX now offers a **NEW** Sliding Door size, offering you even more choice within this extensive range.

NEW Loft Sizes

MBOX also offers 3 **NEW** reduced height doors, in addition to our existing loft products. Perfect for converted loft spaces.

How it Works

If you wanted to make up a Walk In Wetroom for an area to fit on to a 1200mm \times 800mm tray or floor. You pick a panel E (700mm) and a G (800mm), this also includes the recommended 500mm minimum opening for the Walk In

Minimum Opening

We recommend a minimum opening of 500mm for any wetroom area.

Ceiling Bracing Bar

^{**}Please Note: Panels A-D do not come with a stabilising bar / Panels E-M come with stabilising bar.

Inline Panels

Every Space Covered

Bifold Door with Inline Panel

Sliding Door with Inline Panel

Pivot Door with Inline Panel

MBOX also offers you additional Inline Panel options. A great solution for spaces which don't suit standard size enclosures. The two Inline Panel sizes, each combined with our existing Sliding, Bifold and Pivot Doors, can make an enclosure to fit any space from 650mm to 1900mm wide.

With cover strip - conceals all fixings

Product Information

All MBOX products are manufactured in accordance with EN 14428 and utilise toughened safety glass to EN 12150.

All doors feature adjustable wall profiles to compensate for out-of-true walls to obtain a perfect fit and operating action.

All enclosures, are power shower approved – will retain water under normal showering conditions.

Water retention is maintained in all products under normal showering conditions.

Opened cartons cannot be returned. Returns carry a £40 box charge or £60 per unit where the sale is less than 7 days old. Returns over 30 days old will not be accepted.

All products are supplied complete with full installation instructions and the necessary fixings.

Check with your dealer for accurate matching of material samples.

Our policy of reviewing product design and development on a regular basis means MERLYN reserve the right to change product specifications and prices without notice.

Only shower enclosures, panels and bath screens are covered by guarantees. Please contact the MERLYN sales team for more details.

Glass shattering and parts subject to wear are not covered by your guarantee.

Lifestyle images are for illustrated purposes only. The colours and finishes shown in the catalogue are as accurate as possible within the limits of the printing process. The positioning of all showering heads in the brochure is for illustrative purposes only.

All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon the company.

Bath Screen Information

MBOX bath screen is not designed to fit on baths with stepped fronts, roll top rims or integral soap dishes. Fitting of screen on baths which have a raised head rest or shape is not recommended. Screen must not be impaired by bath handles.

There must be no items causing obstruction with the seal and bath, as any of the above may cause leaks.

When choosing your bath screen, please ensure that if your bath has bath handles, that they do not interfere with the bath rim area where your screen will be placed.

When choosing an in-swing or folding bath screen, please ensure your swing area is not interfering with any brassware or internal shower features. Similarly, when choosing an out-swing, please ensure the out-swing area is free from any obstructions.

MBOX bath screens are suitable for standard pressure showers and are not recommended for use with power showers.

It is recommended that the shower head position is situated on the same wall to which the bath screen is fixed and in the centre of the shower area.

Adjustment

This is the minimum and maxium adjustment of the actual enclosure. These are the adjustment dimensions of the actual door excluding the tray. Therefore, these are the dimensions to follow when installing an enclosure in a wetroom application without a tray.

Cleaning

It is important to clean your MBOX shower door after every use.

Wipe down all the glass and metal parts with a soft cloth.

Do not allow lime scale to build up in hard water areas.

Ensure that any residual water on the glass is removed after every use.

Clean the glass regularly using soapy water.

Do not use abrasive products on any surfaces.

Install the enclosure in a well ventilated area.

For more information on Mershield Stayclear glass please visit www.merlynshowering.com.

Information and Maintenance

Always read the instructions on the packaging, chrome is vulnerable to acid attack and some strong household cleaners including strong disinfectants, denture cleaners, hair dyes, wine making chemicals and photographic chemicals may contain acid. These materials may have a varying effect on the surface from black spots/streaks (which cannot be removed) to pitting the surface. Contact with these materials should be avoided.

Important shower tray information

Although shower door and enclosure sizes are related to tray sizes it is important to note that most shower trays are tiled down to the rim, often over an "up-stand". The finished installation space may be less than the nominal tray size.

Dimensions given in this publication are in millimetres, are approximate and may vary with adjustment. They are subject to change without notice.

Please note that when a tray is fitted it is essential that the tray is level before any doors or enclosures are fitted.

MERLYN invests heavily in its product development and as such guarantees that its glass fully complies with regulations and its manufactured in accordance with BS EN 14428.

The rigorous testing of the glass ensures that the endurance, stability and water retention criteria meet high industry standards

Please Note

Prices are correct at time of print April 2019. E&OE. Due to circumstances beyond our control, prices may be altered including changes to the rate of VAT. Due to our policy of continuous improvement, we reserve the right to amend prices, specifications and designs without prior notice. Images are for illustrative purposes only. The colours and finishes shown in the catalogues are as accurate as possible within the limits of the printing process. All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon the company.

ISO Certification

MERLYN has implemented an Integrated Management System comprising of Quality Management, Environmental Management and Occupational Health and Safety Management. An Integrated Management System ensures the seamless integration of several different standards into a common system that meets the requirements of each of these standards. These certifications are proof of MERLYN's credibility but also to instil confidence in our potential clients that MERLYN will keep its promises.

MERLYN SHOWERWALL COLLECTION

The advantages of Showerwalls are numerous

They are easier to clean, great for small spaces and offer ease of access to all. Merlyn offers you a vast range of Showerwalls with every style and budget in mind. Whether you are after the New York Style Loft appeal or you need to create a bathroom with inclusive design, Merlyn Showerwalls are the solution for you.

Merlyn Showerwall panels are manufactured using 10mm and 8mm toughened safety glass, adding to the quality feel of this range. With an impressive 2000mm glass height, Merlyn Showerwalls give you an amazing sense of space when showering. We also offer you the ability to tailor your Showerwall to suit your space, whether it's for a recess or corner situation, with or without end panels. And they are suitable for either wetroom floors or Tray application too.

The CE marking on Merlyn enclosures is a declaration that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

The CE marking on a product indicates to government officials that the product may be legally placed on the market in their country. This ensures the free movement of the product within EFTA and European Union single market and permits the withdrawal of the non conforming products by customs and enforcement authorities.

The European Union's "new approach directives" are mandatory on all member countries to enact through national legislation. This legislation requires manufacturers to display a CE marking on their product, packaging and accompanying literature. Where a new approach directive is in force, it is (with few exceptions) an offence to place a product on the market without a CE marking.

The manufacturer is legally responsible for ensuring that the product conforms to the requirements of the directive.

CE marking is one important measure that the EU has adopted to establish the single market and foster economic development for the member states. The objective of the directives is to simplify the movement of goods into and within the EU. This may eventually lead to the free movement of goods throughout Europe as more and more European countries are expected to join the EU.

The European Commission thus refers to the CE marking as a "Passport" which allows products to be freely circulated within the EU single market.

Often consumers will consider CE marking on a product as an indication of conformance to laid down minimum standards and therefore, a minimum level of safety which other products may lack. CE marking is for many consumers a "Symbol of Safety."

TEMPERED GLASS
EN14428

Merlyn invests heavily in its product development and as such guarantees that its glass fully complies with regulations and is manufactured in accordance with BS FN 14428.

The rigorous testing of the glass ensures that the endurance, stability and water retention criteria meet high industry standards.

 \in

General Product Information

All products are manufactured in accordance with EN 14428 and utilise toughened safety glass to EN 12150.

Aluminium sections are extruded to BS 1474 from alloys complying with BS 6463 and coated to BS 6464.

All Showerwall Panels are power shower approved and will retain water under normal showering conditions. Normal showering conditions assume that the shower head is positioned appropriately for normal shower use and does not include spray extending beyond the width of the Panel. Please note the natural limitations of a door-less enclosure before fitting.

Merlyn Showerwall Panels are frameless in design. Spray/mist may escape therefore we would recommend use of these enclosures with tiled floors.

Opened cartons cannot be returned. Returns carry a £40 box charge or £60 per unit where the sale is less than 30 days old.

Returns over 30 days old will not be accepted.

All products are supplied complete with full installation instructions and the necessary fixings.

Check with your dealer for accurate matching of material samples.

Product descriptions do not imply the use of precious or valuable materials.

Our policy of reviewing product design and development on a regular basis means Merlyn reserve the right to change product specifications and prices without notice.

Showerwall Panels are covered by a 20 Year Guarantee. please contact the Merlyn sales team for more details. Glass shattering and parts subject to wear are not covered by the 20 Year Guarantee.

The positioning of all showering heads in the brochure is for illustrative purposes only.

All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon the company.

For full details on all product ranges please visit www.merlynshowering.com

Cleaning

It is important to clean your Merlyn Showerwall and tray after every use.

Wipe down all the glass and metal parts with a soft cloth.

Do not allow lime scale to build up in hard water areas.

Ensure that any residual water on the glass is removed after every use.

Clean the glass regularly using soapy water.

Do not use abrasive products on any surfaces.

Install the enclosure in a well ventilated area.

For more information on Mershield Stayclear glass please visit the Merlyn Showering website.

Chemicals to Avoid

Always read the instructions on the packaging, chrome is vulnerable to acid attack and some strong household cleaners may contain acid.

Other products that may contain acid include; strong disinfectants, denture cleaners, hair dyes, wine making chemicals and photographic chemicals.

These materials may have a varying effect on the surface from black spots/streaks (which cannot be removed) to pitting the surface.

Contact with these materials should be avoided.

Prices

Please Note:

Prices are correct at time of print March 2017. E&OE. Due to circumstances beyond our control, prices may be altered including changes to the rate of V.A.T. Due to our policy of continuous improvement, we reserve the right to amend prices, specifications and designs without prior notice. Images are for illustrative purposes only. The colours and finishes shown in the catalogues are as accurate as possible within the limits of the printing process. All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon the company.

Shower Trays

Please ensure that the colour and size of the Shower Tray are as per your order before installation.

You must inspect the product thoroughly before installation. Fitting the product is acceptance of quality.

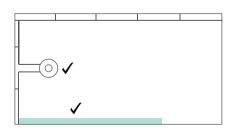

The Shower Trays are handmade from natural material. Please allow for height variances due to manufacturing tolerances.

The Waste has the capacity to carry away 29L/Min using a DWAS waste and 32L/Min using a DWAS Twisto. High powered systems may exceed this. Please check with the manufacturer.

It is up to the designer or installer to ensure that the tray and enclosure combination is arranged in such a way that water retention meets the customers needs.

For open ended shower screens please consult your installer.

Shower Trays must be fitted as per the fitting instruction. Deviation from the pre installation checks or fitting installation will void the guarantee.

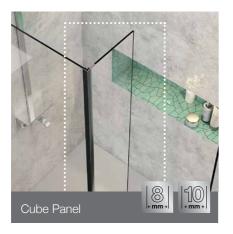

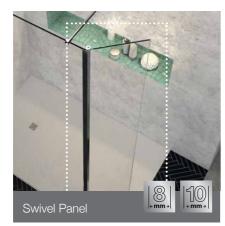

Trav and Showerwall combinations arranged in such a way that water retention meets the customers needs.

This is the min and max adjustment of the actual enclosure. These are the adjustment dimensions of the actual door excluding the tray. Therefore, these are the dimensions to follow when installing an enclosure in a wetroom application without a tray.

Take the measurements after the tray is installed and the walls are tiled. It is essential that the tray is level before any doors or enclosures are fitted.
