If a product fails due to a manufacturing fault, VitrA will offer a free replacement or replacement parts. If a product is not available, VitrA will offer an alternative to the same value.

Every effort has been made to make the colours/finishes in this brochure as accurate as possible, however we cannot guarantee an exact match due to the printing process.

[†]1-year guarantee on internal working parts.

ICON GUIDE

WATER SAVING

VitrA water saving WCs, marked with this symbol, have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes. By using less water, whilst still delivering efficient flushing, these water saving WCs benefit you and the environment. All VitrA standard height wall-hung frames come with dual flushing function as standard in both 2.5/4 litre and 3/6 litre options.

SPACE SAVING

A wall-hung WC takes up less room than a conventional WC, and the concealed installation offers flexibility in confined spaces. The range of short-projection WCs have a shorter depth, saving even more space.

RIM-EX TECHNOLOGY

Offering effortless cleaning and innovative, hygienic design. VitrA's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

WRAS

The purpose of WRAS is to contribute to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

WASHBASIN FORMS

Washbasins can be used with a pedestal as well as being wall-hung. Basins suitable for use with a countertop can be fitted in three alternative ways:

FISCHER

A simple, elegant installation system for use with wall-hung WCs. The fixings are hidden from sight by the use of internal ABS sleeves, creating a clean, smooth design.

ACCESSIBLE

These products are wheelchair accessible and provide enhanced convenience in the bathroom.

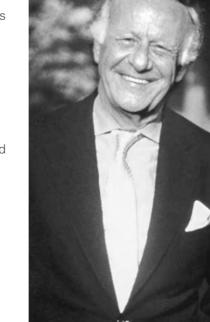

THE ESSENCE OF VITRA

A HISTORY OF INGENUITY

VitrA's rich heritage can be traced back to 1909, when renowned Turkish pharmacist Süleyman Ferit Eczacibaşi began producing bathing and cologne products at his pharmacy in Izmir. Three decades later, his son, Dr Nejat Eczacibaşi, took the family business a step further by establishing a pharmaceutical

laboratory in Istanbul. The business continued to grow steadily, and by 1952 he had opened Turkey's first modern pharmaceutical plant. Within a few years, Eczacibaşi's vision had grown further still, with the establishment of Turkey's first ceramic sanitaryware plant in 1958. The VitrA brand was adopted in 1966.

Within a few years, Eczacibași's vision had grown further still, with the establishment of Turkey's first ceramic sanitaryware plant in 1958 and in 1966 the **VitrA** brand was adopted.

Pictured: Süleyman Ferit Eczacibaşi

INTERNATIONAL RECOGNITION

VitrA's successful relationships with international designers have resulted in many accolades for the company.

This includes the Wallpaper Design Award for Best Bathroom, an Elle Décor Award, Good Design Award, Red Dot Design Award and no fewer than three iF product design awards for excellence in product and design quality.

AN INTERNATIONAL BRAND, VITRA PRODUCES FIVE MILLION PIECES OF SANITARYWARE PER YEAR AND EXPORTS TO 75 COUNTRIES WORLDWIDE

INNOVATION AND CREATIVITY

VitrA's Innovation Centre - where all the magic happens, from the conception, development and realisation of original ideas and designs, to the innovation, planning and production of new technology and materials.

Here, architects and designers are encouraged to free their imaginations and original ideas are showcased in a setting that blends culture, art and lifestyle.

Architects and designers are encouraged to free their imaginations

It's this commitment to innovation and creativity, to constantly improve comfort, sustainability and bathroom aesthetics, that is helping us transform the traditional concept of the bathroom.

Pictured: The Innovation Centre

The Shift range designed by award-winning studio NOA

INNOVATION EVOLUTION OF THE VITRA BRAND Süleyman Ferit Eczacıbaşı opens Turkey's first production Bey, Dr. Nejat plant for ceramic sanitaryware. Eczacıbaşı's father, is given the title of "Eczacıbaşı". The VitrA brand Dr. Nejat Eczacıbaşı establishes a was first adopted. pharmaceutical laboratory in Istanbul. The group opened its first His first product is a vitamin capsule. brassware plant within its Bozüyük mega complex. 1912 1909 1942 1952 1958 1966 1977 1979 Eczacıbaşı inaugurates the first Turkish modern pharmaceutical plant in Istanbul.

Production of acrylic bathtubs and ceramic tiles began at the Tuzla plant.

VitrA opens its first sales and marketing offices outside of Turkey. VitrA Bad (Germany) and VitrA UK Ltd.

1983

production facilities.

Süleyman Ferit Bey buys the Sifa Pharmacy in Izmir and begins producing toothpaste, lotions and creams.

The Eczacibasi Group's first ceramic factory in Bozüyük began production (over time this grew to become the Bozüyük mega complex).

INNOVATION

Start of a \$45.4m investment in the production plant at the Bozüyük complex to increase capacity by a further 20%.

V-care is launched - the new generation of shower toilet.

VITRA RIM-EX™

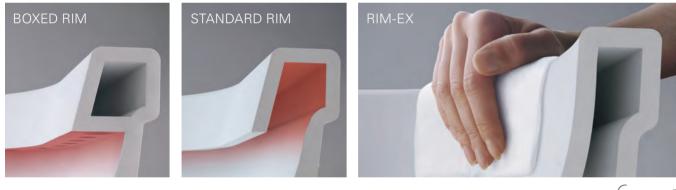

VitrA's rimless WC pan technology removes one of the most unhygienic aspects of traditional WC design, where hard-to-clean rims can harbour germs and allow them to multiply unchecked.

The unique design of our Rim-ex pans incorporates a water diverter to direct the flush around the bowl, which can be removed easily for cleaning. Rim-ex is 95% more hygienic than standard WC pans^{*}

*Tests undertaken by the Akdeniz University, Turkey show VitrA Rim-ex WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

The redesigned bowl features a smooth, channel-free design to discourage germ reproduction and provide superior hygiene.

V-BOX

V-Box, by VitrA, is the new generation of standard and thermostatic shower solutions for concealed bath and shower mixers enabling up to three water outlets (bath spout, overhead shower or handshower).

Whether you are looking for a contemporary design in either square or round shape, there is a range suitable for any bathroom setting.

VITRA INFINIT

Bathroom products made from mineral cast are distinguishable by the thinner profile edges and clean lines.

A material manufactured by using a combination of natural stone powder and a polyester resin, mineral cast produces a beautiful finish which is warm to the touch and easy to clean, it can also be used to create basins in a wide range of shapes and sizes.

Mineral cast is a hard-wearing material with the added benefit of being invisibly repairable in the unlikely event of the basin becoming damaged.

Beautiful, thin profile edges. See and feel the difference with **VitrA Infinit**.

SHOWER VALVE

The shower valve controls the flow of water, similar to the tap on a basin. By concealing the shower valve behind the wall, this creates more space under the shower head making cleaning easier.

V-Box can be trimmed to fit a minimum wall depth (including wall covering) of 110mm, maximising the available bathroom space.

For more information on V-Box, see page 90.

Blue Life For our blue planet...

Blue Life is the production approach, design, attitude and management outlook of all Eczacıbaşı Building Products Division brands including VitrA.

PRODUCT CERTIFICATES

BLUE LIFE

A PLEDGE TO THE FUTURE

- Blue Life means reducing the use of non-renewable resources in the production process.
- Blue Life means developing products that promote power and resource conservation at the end-user level driven by a concern for the environment and for our collective future.
- Blue Life means making significant investments towards boosting eco-efficiency.
- VitrA believe managing the future requires efficient management of our resources today; good design also means taking responsibility for resource conservation.

PRODUCTION CERTIFICATES

ISO 9001 Quality Certification / ISO 14001 Environmental Certificate / ISO 50001 Energy Management System Certificate / OHSAS 18001 Occupational Health and Safety Management System Certificate

The manufacturing plants are equipped with specifically designed recycling systems to reduce raw material and power consumption.

Under the guidance of effective waste treatment methods implemented by the Eczacibasi Building Products Division, in 2017 optimal purifying technologies were developed to recover water. Today VitrA, part of the Building Products Division, consume 35% less water of production output.

Temperatures of the ceramic kilns were also readjusted in the VitrA plant, reducing energy consumption by 15%.

The same responsibility for natural resource conservation guides the group in the development of products for both residential and public use. So you know choosing a VitrA product means you are contributing to saving the worlds natural resources.

YOUR CONTRIBUTION TO SAVING WATER

VitrA's products are developed and designed in line with our Blue Life philosophy, and reflect our commitment to preserving and recycling natural resources.

WATER SAVING

All VitrA concealed cisterns are equipped with fill valves and by adjusting the gauge, it is possible to operate the cistern with 2.5/4 litre or 3/6 litre flow performance.

Raw Raw (Doc./ stande)	water label	
Max 3.5		
www.europeanwaterlabel.eu		

If 250 WC pans were changed from a 9 litre to a 2.5/4 litre cistern, enough water would be saved to fill three olympic-sized swimming pools.

- For example, the 2.5/4 litre WC pan has been certified by the German LGA Institute and reduces water use by up to 60% compared to the single flush.
- With VitrA's brassware equipped with an adjusting pin, special ceramic cartridges can be set to limit the amount of water released creating savings of up to 60%.
- Finally, thermostatic bathtubs and shower mixers save water and power by eliminating the need to adjust hot and cold water until the desired temperature is achieved, ensuring reliable water flow temperatures.

WRAS

VitrA products with WRAS approval mean they comply with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

THE SIGNATURE COLLECTION

We have highlighted these products with our Signature lcon.

With design at the core of the VitrA brand, we want to help you create a bathroom that works for you; whether you want to create a space of Zen like calm or a practical, hard working space that meets the demands of the whole family.

The Signature Collection is a selection of ranges that highlight the design and innovation credentials of the VitrA brand. These new ranges are exclusive to the Signature Collection and provide new shapes, innovative technologies and more choice with mineral cast and ceramic options.

V-CARE

Introducing V-care, the new generation of shower toilet from VitrA. The functionality of the toilet has been combined with the cleaning properties of a bidet to create a stylish WC that can seamlessly integrate into your bathroom.

All functions can be accessed using the remote control and to ensure you have a totally personalised washing experience, all the main functions are variable. Please see page 16 for further details.

Features like the heated seat offers an additional level of comfort.

ECORA INFINIT

In addition to the classic ceramic basins within the Ecora range we have introduced the new Ecora Infinit. This range of bathroom furniture has basins made from mineral cast.

This material is manufactured by using a combination of natural stone powder and a polyester resin that produces a beautiful finish, which is warm to the touch and easy to clean. Mineral cast is a hard-wearing material with the added benefit of being invisibly repairable in the unlikely event of the basin becoming damaged. The basins are distinguishable by the thin profile edges and clean lines. Please see page 50 for further details.

Mineral cast allows for thinner, more defined edges providing a minimal natural aesthetic.

INTEGRA

A comprehensive range that recognises the need for individuality. The wide variety of product accommodates diverse bathroom design by combining dual tones for a natural and organic style in the bathroom.

The basin design offers square and round options. The furniture range is extensive with three colour way options in sizes from 60cm to 120cm.The upper wall cabinets and tall units boast a shorter depth but broader width so items are easily accessible whilst providing essential storage when space is at a premium.

Integra is a range that meets all needs; en-suite, cloakroom or main bathroom. Please see page 20 for further details.

Integra takes its inspiration from natural forms, giving you the choice of three colour finishes.

SHIFT

Designed in collaboration with German design studio NOA, the curved lines and deep basin lend a simplistic and beautiful bathroom range.

The range of basins and WCs are complemented by a compact washbasin unit, mirror and mirror cabinet and co-ordinating shelf.

Wall-hung sanitaryware and furniture makes cleaning simple and easy, allowing you more time to relax in your home. Please see page 24 for further details.

A simple, striking design by German Design studio **NOA**.

V-CARE 3.

When you feel fresh and clean, it gives you the confidence to take on the demands of the day. Using water to clean yourself after going to the toilet is becoming more popular as people understand and experience the feeling of complete cleanliness and freshness.

£1439

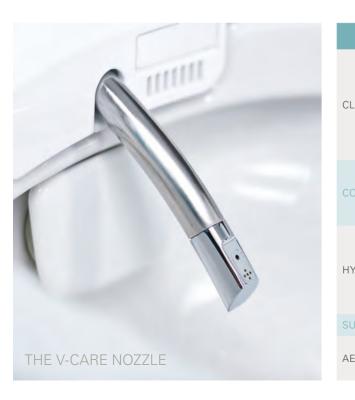

5674 V-care WC, Essential

The V-care WC, is the new generation of shower toilet from VitrA. It combines the functionality of a toilet with the personal cleaning properties of a bidet, creating a stylish WC that will seamlessly integrate into your bathroom.

All the main functions are variable to create a totally personalised washing experience. The intensity of the water jet is adjustable as is the water temperature for both the front and rear washing options.

The ergonomically designed heated seat offers an additional level of comfort and the automatically activated air purifier eliminates those unwanted bathroom odours.

An elegant, universal form designed to blend and integrate well in virtually any bathroom environment.

	MAIN FEATURES
	Rear washing
	Front washing
EANING	Adjustable nozzle position
	Adjustable jet intensity (water pressure control)
	Adjustable water temperature
	Soft-close seat
OMFORT	Heated seat
	Adjustable seat temperature
	Self-cleaning nozzle
GIENE	Removable nozzle tip for manual cleaning
IGIEINE	Automatic air purifier – deodorisation
	Rim-ex design
JSTAINABILITY	Energy saving mode
STHETICS	Concealed plumbing connections
STHELICS	Concealed electricity connections

SIMPLE TO OPERATE

For ultimate convenience, all the V-care functions can be accessed using a remote control and operated with the touch of a button while you sit comfortably on

the WC. The basic functions of the WC can also be controlled via the left and right side of the toilet itself.

With concealed fixings and no awkward rim to negotiate in the inner bowl, the V-care WC is very easy to clean. Rim-ex technology removes the need for a rim

EASY-TO-CLEAN

inside the WC pan. The inner bowl can be cleaned with a single wipe.

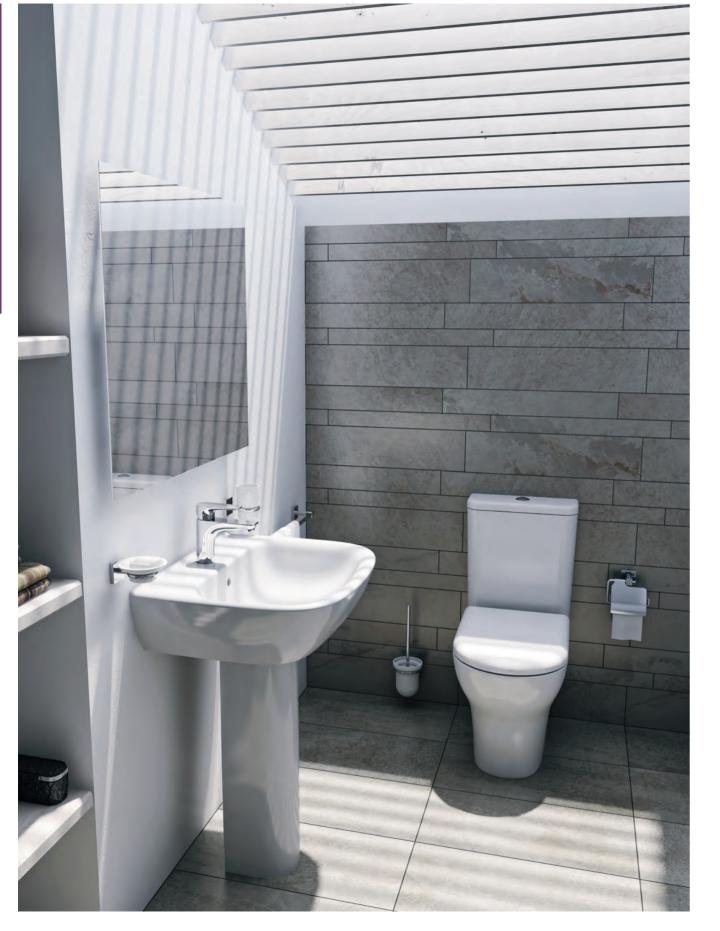

AWARD-WINNING DESIGN

The WC is designed by NOA, the award-winning German design studio. Their designs blend precise, cutting-edge engineering

with ingenious creativity to meet contemporary needs. The design of the V-care WC ensures it can integrate into any bathroom without overwhelming the space or becoming the focal point of the room.

Full details of our V-care WC are available on request or can be found at vitra-vcare.co.uk

V-B MIN MO SHO COI

SHOWER SYSTEMS

The shower is an important element in any bathroom and it is probably one of the hardest working elements of a bathroom design. Shower systems will refresh and revitalise and with the choice of designs, there is a shower solution perfect for your bathroom.

To help select the right look for your bathroom, VitrA have introduced five complete shower solution. Each shower system conveniently brings together every working element needed to create a beautiful showering environment.

> Vitr sho and syne

OX	90
NBOX	100
VE	104
OWER SYSTEMS	106
MPLETE SHOWER SOLUTIONS	114

A's shower systems include a collection of hand wers with and without side rails, beautiful showerheads shower columns all with the design credentials onymous with the VitrA brand. Choosing a shower system is one of the most important aspects of the bathroom design especially given the range of overhead and handshower styles to choose from.

V-BOX

V-Box, by VitrA, is the new generation of standard and thermostatic shower solutions for concealed bath and shower mixers enabling up to 3 water outlets (bath spout, overhead shower or handshower).

The shower valve (see right) controls the flow of water, similar to the tap on a basin. By concealing the shower valve behind the wall, this creates more space under the shower head making cleaning easier. V-Box can be trimmed down to fit behind the wall. With a minimum wall depth (including wall covering) of 110mm, you do not lose valuable room space with V-Box.

V-Box also offers a choice of thermostatic and standard shower valves

For the visible (exposed) part of the shower solution there is a choice of four styles; each with a full range of matching basin and bath fillers.

V-Box also offers a choice of thermostatic and standard shower valves.

Thermostatic shower valves are designed to maintain the temperature of the water, preventing fluctuations in the water temperature. This is an important consideration for families where extremes in water temperature can be dangerous.

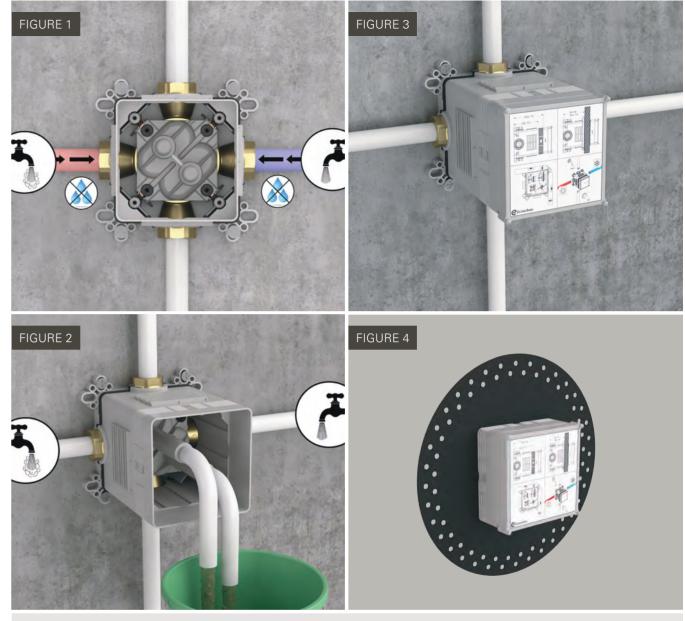

WATER OUTLET OPTIONS

- **1-way:** shower mixer, with adjustable water temperature control
- 2-way: water can be diverted to the shower head or to the bath. Water temperature can be adjusted using one controller. Hot and cold water feed separately into the concealed valve.
- **3-way:** using a diverter the water can be directed to either the bath, shower head or handshower.

There is also a choice of standard shower values but these do not regulate the water temperature so if someone turns on a tap elsewhere in the house the water from the shower may run too hot or too cold.

Diverters enable the flow of water to be switched from one outlet to another, for example to the shower head or handshower. V-Box diverters allow for 3-way outlets: bath spout, overhead shower and handshower.

INSTALLATION

FIGURE 1

IMPERMEABILITY TEST

The water inlet pipes are fitted as shown above. This ensures the V-Box is mounted correctly and tightly to prevent leaks. There are also multiple fixing points.

FIGURE 2

CLEANING

After connecting the water feeds the special V-Box design also allows for any debris that may have accumulated from the installation process to be flushed out.

SHOWER SYSTEMS

FIGURE 3 **GYPSUM PLATE WALL MOUNTING**

Once the water inlet pipes are connected and cleaned, the box is fitted to the wall using the multiple fixing points. Special design enables easy mounting on gypsum plate walls.

FIGURE 4

HUMIDITY PROTECTION

To further protect the mechanism from humidity within the bathroom environment an insulating mattress is fitted. Additional sealing cuff protects the wall from humidity.

CHOOSING THE RIGHT SHOWER SYSTEM WITH V-BOX

Whether you are looking for a contemporary design in either square or round shape, there is a range suitable for any bathroom setting.

After the tiling is completed the front of the box is trimmed to the correct depth and the appropriate brassware is then fitted.

V-Box can be used with the new Suit ranges, Minimax S and X-Line, **providing choice for consumers**

	SUIT
BUILT-IN BATH/ SHOWER MIXERS (2-WAY)	
BUILT-IN SHOWER MIXERS (1-WAY)	A42288

A42292

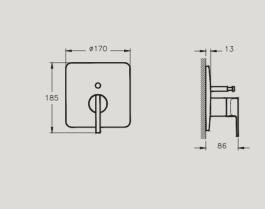

SHOWER

V-Box can be used with brassware, enabling one, two or three way outlets. Within the compatible ranges there are bath mixers and bath/shower mixers (including thermostatic) and diverters. V-Box can be used with Suit, Minimax S and X-Line exposed parts, providing choice for consumers. All exposed parts, including the handles are made of metal.

INSTALL & SPECIFY WITH CONFIDENCE

PRACTICAL AND ESSENTIAL FOR THE MODERN BATHROOM

The last thing your beautiful bathroom needs is an unsightly mess of cisterns, pipes, U-bends and other functional elements spoiling the look and ambience. Using a wall-hung frame is the answer, and aside from a much tidier look, there are lots of practical benefits too.

HYGIENIC

Keeping a bathroom clean is so much easier with a wall-hung WC. All pipework, usually a haven for dust, is completely concealed, and with the WC pan fixed above the floor, it's so much easier to keep the floor clean.

QUIET

Not only is the cistern concealed behind a wall, but it's also manufactured with a specially-engineered fill valve, and lined with insulating styrofoam to keep filling noise to an absolute minimum.

QUALITY AND ASSURANCE

RIGOROUS RELIABILITY AND PERFORMANCE TESTING

VitrA's wall-hung frames are subjected to rigorous reliability and performance testing at VitrA's production facilities.

OVERFLOW

....

An overflow pipe located within the valve acts as a safety device. Overflow pipes are tested to ensure they can cope even in high water pressure areas.

SPACE-SAVING

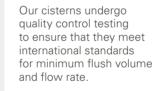

A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

WATER-SAVING

The dual-flush action for both the 8cm and the 12cm wall-hung frames operates at 2.5/4 litres or 3/6 litres, resulting in as much as 70% reduced water consumption, benefiting both you and the environment.

FLOW RATE

EASY ACCESS

The flush plate can be removed easily, providing easy access to internal fittings. Flush plates have a 5-year guarantee.

QUICK AND EASY

An intuitive design makes installation quick and easy – a real advantage, particularly when carrying out multiple installations.

All products are subjected to rigorous testing at our production facilities to ensure that they function perfectly before passing quality control.

PERFORMANCE

NG y and performance testing

STRENGTH AND STABILITY

Wall-hung WC pans and their concealed frames are designed to be able to support up to 400kg.

LEAK DETECTION

Every cistern we manufacture is individually tested to ensure it is 100% watertight.

DURABILITY

Our products are periodically tested for durability according to international standards. To pass this testing, every single component must still be functioning perfectly after 200,000 consecutive operations.

SPECIFIC DESIGN FEATURES

7

9 INTERMEDIARY HOSE

The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, which enables easy replacement of parts.

8 PANEL GAP

The panel gap on the body is designed to provide optimum opening space for maintenance of filling or flushing units, enabling easy access to the cistern. The size of this gap is very important for servicing purposes.

BODY STYROFOAM The Styrofoam that coats the

entire lower body prevents condensation in the cistern and ensures sound insulation.

6 FLUSHING VALVE

The flushing valve transfers the water in the cistern to the WC pan for flushing. For correct and reliable functioning, flushing units are subjected to 200,000 water-tightness and accelerated life tests at the factory.

5 METAL STAND Metal stands enable easy adjustment of height from the floor and secure fixing.

1 FLUSH PLATE

2 BODY

The flush plate operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.

The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.

3 FILLING VALVE

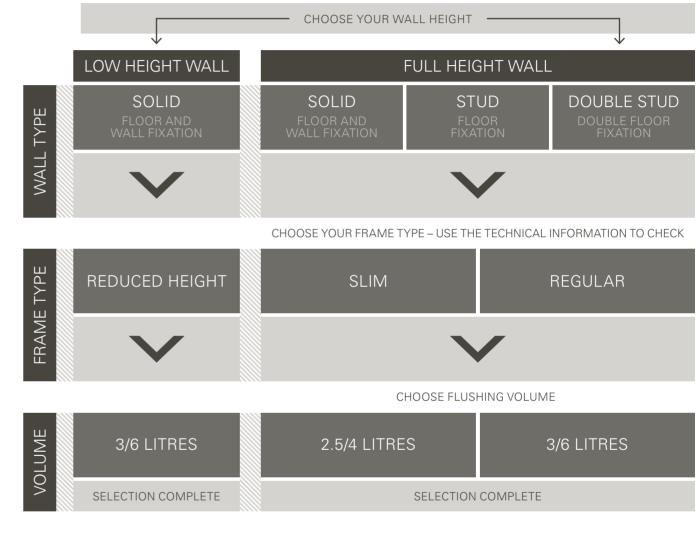

The filling valve is the system that fills the cistern with water. The filling valve is checked in VitrA labs for "water-tightness" via accelerated life testing 200.000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New VitrA filling systems ensure fast and silent filling.

Image for illustration purpose only (regular frame)

The overflow pipe in the flushing mechanism takes the safety duty in wall-hung frames. When too much water enters the cistern, the overflow pipe channels the excess water into the WC pan, preventing the risk of flooding.

Whatever your project needs, the range of VitrA wall-hung frames offers you complete flexibility. Both the slim and regular sized frames can be used in solid wall, stud wall and double stud wall scenarios, and are all available with a choice of flushing volumes. The slimline frame is perfect when space is at a premium.

FLUSH PLATES

With a VitrA wall-hung frame, only the flush plate is visible; two buttons that release either a large or small quantity of water.

VitrA offers a wide range of design solutions, with different finishes and shapes, giving you the freedom to create the bathroom you've always wanted.

Most VitrA flush plate designs feature an anti-fingerprint finish. This finish is extra hygienic, as it is easier to clean and protects against bacteria.

For this reason, whether it's a mechanical, pneumatic or electronic panel system required, VitrA has a flush plate and frame to suit.
