If a product fails due to a manufacturing fault, Vitra will offer a free replacement or replacement parts. If a product is not available, Vitra will offer an alternative to the same value.

Every effort has been made to make the colours/finishes in this brochure as accurate as possible, however we cannot guarantee an exact match due to the printing process.

*1-year guarantee on internal working parts.

ICON GUIDE

WATER SAVING

VitrA water saving WCs, marked with this symbol, have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes. By using less water, whilst still delivering efficient flushing, these water saving WCs benefit you and the environment. All VitrA standard height wall-hung frames come with dual flushing function as standard in both 2.5/4 litre and 3/6 litre options.

SPACE SAVING

A wall-hung WC takes up less room than a conventional WC, and the concealed installation offers flexibility in confined spaces. The range of compact WCs have shorter projection, saving even more space.

ACCESSIBLE

These products are wheelchair accessible and provide enhanced convenience in the bathroom.

RIM-EX TECHNOLOGY

Offering effortless cleaning and innovative, hygienic design. VitrA's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

WRAS

The purpose of WRAS is to contribute to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

INNOVATION
AND CREATIVITY

VitrA’s Innovation Centre – where all the magic happens, from the conception, development and realisation of original ideas and designs, to the innovation, planning and production of new technology and materials.

Here, architects and designers are encouraged to free their imaginations and original ideas are showcased in a setting that blends culture, art and lifestyle.

Architects and designers are encouraged to free their imaginations

It’s this commitment to innovation and creativity, to constantly improve comfort, sustainability and bathroom aesthetics, that is helping us transform the traditional concept of the bathroom.

Pictured: The Innovation Centre

THE ESSENCE OF VITRA

A HISTORY OF INGENUITY

VitrA’s rich heritage can be traced back to 1909, when renowned Turkish pharmacist Süleyman Ferit Eczacıbaşı began producing bathing and cologne products at his pharmacy in Izmir. Three decades later, his son, Dr Nejat Eczacıbaşı, took the family business a step further by establishing a pharmaceutical laboratory in Istanbul. The business continued to grow steadily, and by 1952 he had opened Turkey’s first modern pharmaceutical plant. Within a few years, Eczacıbaşı’s vision had grown further still, and with the establishment of Turkey’s first ceramic sanitaryware plant in 1958, VitrA was born.

Within a few years, Eczacıbaşı’s vision had grown further still, and with the establishment of Turkey’s first ceramic sanitaryware plant in 1958, **VitrA was born**

Pictured: Süleyman Ferit Eczacıbaşı

INTERNATIONAL RECOGNITION

VitrA’s successful relationships with international designers have resulted in many accolades for the company.

This includes the Wallpaper Design Award for Best Bathroom, an Elle Décor Award, Good Design Award, Red Dot Design Award and no fewer than three iF product design awards for excellence in product and design quality.

NOA:
Award-winning designs featured in our Designer Collection

Pictured: NOA

AN INTERNATIONAL BRAND, VITRA PRODUCES FIVE MILLION PIECES OF SANITARYWARE PER YEAR AND EXPORTS TO 75 COUNTRIES WORLDWIDE

INNOVATION

EVOLUTION OF THE VITRA BRAND

Süleyman Ferit Bey, Dr. Nejat Eczacıbaşı's father, is given the title of "Eczacıbaşı".

Dr. Nejat Eczacıbaşı establishes a pharmaceutical laboratory in Istanbul. His first product is a vitamin capsule.

Eczacıbaşı opens Turkey's first production plant for ceramic sanitaryware.

The Vitra brand was first adopted.

The group opened its first brassware plant within its Bozüyük mega complex.

1909 1912 1942 1952 1958 1966 1977 1979 1983 1991 1992 1996 2011 2014 2015 TODAY

Süleyman Ferit Bey buys the Sifa Pharmacy in Izmir and begins producing toothpaste, lotions and creams.

Eczacıbaşı inaugurates the first Turkish modern pharmaceutical plant in Istanbul.

The Eczacıbaşı Group's first ceramic factory in Bozüyük began production (over time this grew to become the Bozüyük mega complex).

Production of acrylic bathtubs and ceramic tiles began at the Tuzla plant.

Start of a \$45.4m investment in the production plant at the Bozüyük complex to increase capacity by a further 20%.

V-care is launched – the new generation of shower toilet.

Vitra opens its first sales and marketing offices outside of Turkey. Vitra Bad (Germany) and Vitra UK Ltd.

The Eczacıbaşı Building Products Division assembles all its R&D teams under one roof with the opening of the Vitra Innovation Centre at Bozuyuk.

The first ceramic sanitaryware exports began.

Eczacıbaşı invests in a second sanitaryware and ceramic tiles production line at the Bozüyük Building Products Complex. With this investment, Vitra has one of the world's largest ceramic sanitaryware production facilities.

Istanbul range receives the Design Classic award by Pro Publishing.

Vitra is an international brand, producing five million pieces of sanitaryware per year and exporting to 75 countries worldwide.

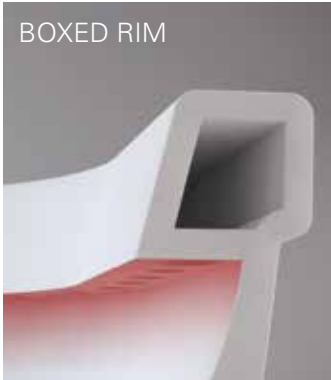

VITRA RIM-EX™

VitrA’s rimless WC pan technology removes one of the most unhygienic aspects of traditional WC design, where hard-to-clean rims can harbour germs and allow them to multiply unchecked.

The unique design of our Rim-ex pans incorporates a water diverter to direct the flush around the bowl, which can be removed easily for cleaning. Rim-ex is 95% more hygienic than standard WC pans*

*Tests undertaken by the Akdeniz University, Turkey show VitrA Rim-ex WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

The redesigned bowl features a smooth, channel-free design to discourage germ reproduction and provide superior hygiene

RIM-EX RANGES

Both the S50 and Zentrum suites offer a Rim-ex option.

V-BOX

V-Box, by VitrA, is the new generation of standard and thermostatic shower solutions for concealed bath and shower mixers enabling up to three water outlets (bath spout, overhead shower or handshower).

Whether you are looking for a contemporary design in either square or round shape, there is a range suitable for any bathroom setting.

SHOWER VALVE

The shower valve controls the flow of water, similar to the tap on a basin. By concealing the shower valve behind the wall, this creates more space under the shower head making cleaning easier.

V-Box can be trimmed down to fit behind the wall. With a minimum wall depth (including wall covering) of 110mm, you do not lose valuable room space with V-Box.

For more information on V-Box, see page 68.

Blue Life

For our blue planet...

Blue Life is the production approach, design, attitude and management outlook of all Eczacıbaşı Building Products Division brands including VitrA.

BLUE LIFE

A PLEDGE TO THE FUTURE

- Blue Life means reducing the use of non-renewable resources in the production process.
- Blue Life means developing products that promote power and resource conservation at the end-user level driven by a concern for the environment and for our collective future.
- Blue Life means making significant investments towards boosting eco-efficiency.
- Vitra believe managing the future requires efficient management of our resources today; good design also means taking responsibility for resource conservation.

PRODUCT CERTIFICATES

PRODUCTION CERTIFICATES

ISO 9001 Quality Certification / ISO 14001 Environmental Certificate / ISO 50001 Energy Management System Certificate / OHSAS 18001 Occupational Health and Safety Management System Certificate

The manufacturing plants are equipped with specifically designed recycling systems to reduce raw material and power consumption.

Under the guidance of effective waste treatment methods implemented by the Eczacıbaşı Building Products Division, in 2017 optimal purifying technologies were developed to recover water. Today Vitra, part of the Building Products Division, consume 35% less water of production output.

Temperatures of the ceramic kilns were also readjusted in the Vitra plant, reducing energy consumption by 15%.

The same responsibility for natural resource conservation guides the group in the development of products for both residential and public use. So you know choosing a Vitra product means you are contributing to saving the worlds natural resources.

For example, the 2.5/4 litre WC pan has been certified by the German LGA Institute and reduces water use by up to 60% compared to the single flush.

With Vitra's brassware equipped with an adjusting pin, special ceramic cartridges can be set to limit the amount of water released creating savings of up to 60%.

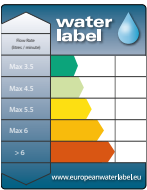

Finally, thermostatic bathtubs and shower mixers save water and power by eliminating the need to adjust hot and cold water until the desired temperature is achieved, ensuring reliable water flow temperatures.

YOUR CONTRIBUTION TO SAVING WATER

Vitra's products are developed and designed in line with our Blue Life philosophy, and reflect our commitment to preserving and recycling natural resources.

WATER SAVING

All Vitra concealed cisterns are equipped with fill valves and by adjusting the gauge, it is possible to operate the cistern with 2.5/4 litre or 3/6 litre flow performance.

WRAS

Vitra products with WRAS approval mean they comply with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

If 250 WC pans were changed from a 9 litre to a 2.5/4 litre cistern, enough water would be saved to fill three olympic-sized swimming pools

BATHROOM RANGES

Inspired by the tradition and principles of Turkish bathroom culture, our innovative bathroom products combine modern technology with world-class design to meet the style, standards and demands of the 21st century.

VitrA’s designers combine high-quality materials with innovative design and space-saving technology to create bathroom suites and products that are practical, durable, and above all, a pleasure to use.

S50

Versatility is a defining feature of this range. Choose from contemporary square lines or organic, rounded forms in a range of sizes. Opt for a comfort or standard-height WC pan with a choice of compact or standard projections. The result: a bathroom suite to perfectly match the user’s needs and taste.

FOR A TRADITIONALLY-STYLED,
SPACE-SAVING BATHROOM

LAYTON

The appeal of the Layton range doesn’t stop at the style of its simple lines. The range is also highly adaptable, with dynamic space-saving solutions at every turn, from minimal-footprint, back-to-wall, WC pans and corner-fitted cisterns, to a choice of tap hole options.

BATHS

All Vitra baths provide a quality finish whilst making installation easy by having fully-encapsulated baseboards and frames.

Bathing has always been associated with health, well-being and relaxation. Vitra’s beautiful range of baths continues to evoke, uphold and enhance these associations. Whatever your preference, be it straight or offset, a sweeping line or a calming curve, our baths make bathing a sensory pleasure.

Vitra baths, made from high-grade acrylic, produce a superb finish. Each bath features a minimum of five adjustable feet, a fully-encapsulated wooden baseboard and frame, and an advanced wall fixing kit to keep the bath tightly in place, ensuring stability with no creaking or bowing. All baths carry a 25-year guarantee, and panels come with a 2-year guarantee.

SHOWER SYSTEMS

The shower is an important element in any bathroom and it is probably one of the hardest working elements of a bathroom design. Shower systems will refresh and revitalise and with the choice of designs, there is a shower system perfect for your bathroom.

To help select the right look for your bathroom, Vitra have introduced five complete shower solutions. Each shower system conveniently brings together every working element needed to create a beautiful showering environment.

Vitra’s shower systems include a collection of hand showers with and without side rails, beautiful showerheads and shower columns all with the design credentials synonymous with the Vitra brand.

Choosing a shower system is one of the most important aspects of the bathroom design especially given the range of overhead and handshower styles to choose from.

V-BOX

V-Box, by VitrA, is the new generation of standard and thermostatic shower solutions for concealed bath and shower mixers enabling up to 3 water outlets (bath spout, overhead shower or handshower).

The shower valve (see right) controls the flow of water, similar to the tap on a basin. By concealing the shower valve behind the wall, this creates more space under the shower head making cleaning easier. V-Box can be trimmed down to fit behind the wall. With a minimum wall depth (including wall covering) of 110mm, you do not lose valuable room space with V-Box.

V-Box also offers a choice of thermostatic and standard shower valves

For the visible (exposed) part of the shower solution there is a choice of four styles; each with a full range of matching basin and bath fillers.

V-Box also offers a choice of thermostatic and standard shower valves.

Thermostatic shower valves are designed to maintain the temperature of the water, preventing fluctuations in the water temperature. This is an important consideration for families where extremes in water temperature can be dangerous.

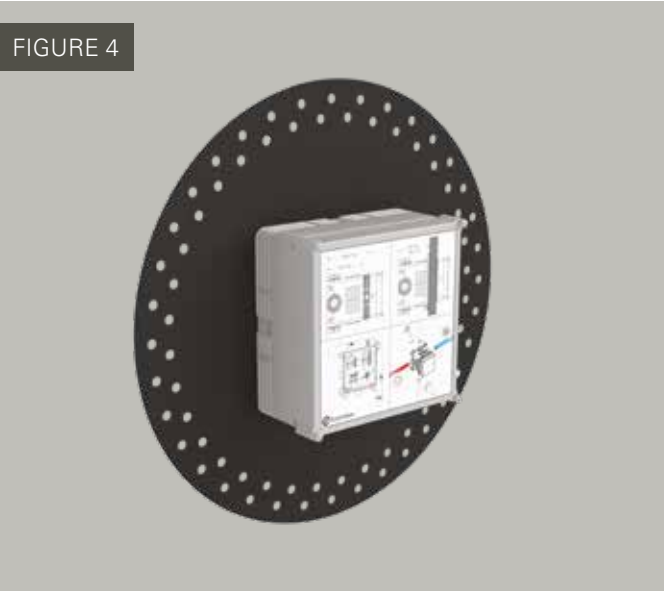

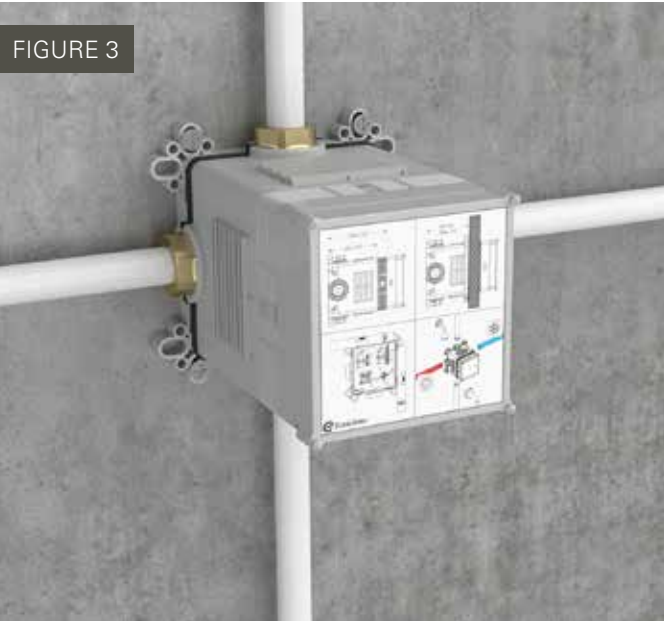

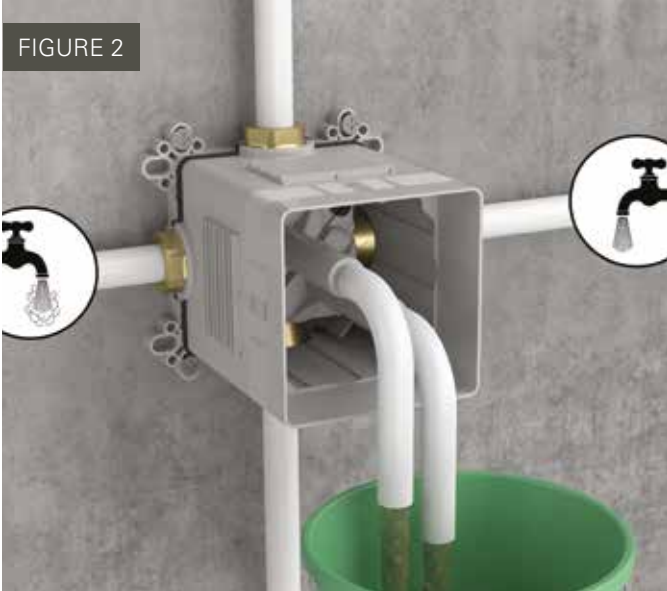

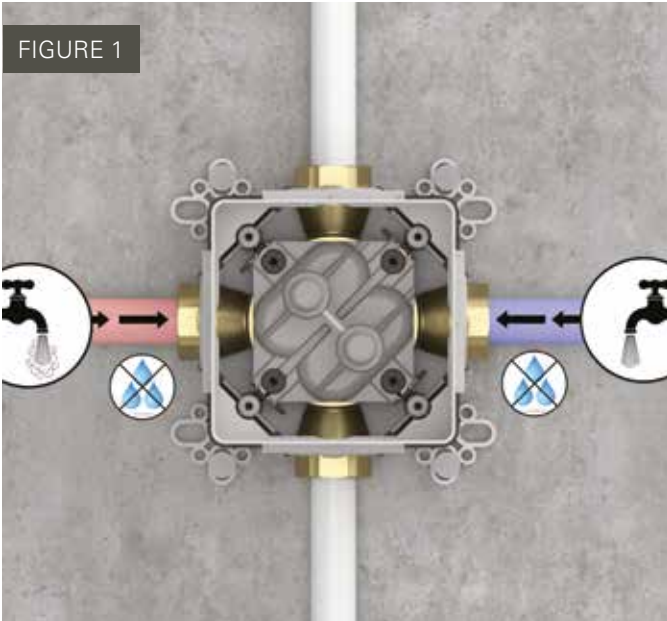

There is also a choice of standard shower valves but these do not regulate the water temperature so if someone turns on a tap elsewhere in the house the water from the shower may run too hot or too cold.

Diverter enable the flow of water to be switched from one outlet to another, for example to the shower head or handshower. V-Box diverters allow for 3-way outlets; bath spout, overhead shower and handshower.

WATER OUTLET OPTIONS

- 1-way:** shower mixer, with adjustable water temperature control
- 2-way:** water can be diverted to the shower head or to the bath. Water temperature can be adjusted using one controller. Hot and cold water feed separately into the concealed valve.
- 3-way:** using a diverter the water can be directed to either the bath, shower head or handshower.

INSTALLATION

FIGURE 1
IMPERMEABILITY TEST
The water inlet pipes are fitted as shown above. This ensures the V-Box is mounted correctly and tightly to prevent leaks. There are also multiple fixing points.

FIGURE 2
CLEANING
After connecting the water feeds the special V-Box design also allows for any debris that may have accumulated from the installation process to be flushed out.

FIGURE 3
GYPSUM PLATE WALL MOUNTING
Once the water inlet pipes are connected and cleaned, the box is fitted to the wall using the multiple fixing points. Special design enables easy mounting on gypsum plate walls.

FIGURE 4
HUMIDITY PROTECTION
To further protect the mechanism from humidity within the bathroom environment an insulating mattress is fitted. Additional sealing cuff protects the wall from humidity.

V-Box, create and co-ordinate the perfect bathroom for your home from our extensive ranges

CHOOSING THE RIGHT SHOWER SYSTEM WITH V-BOX

Whether you are looking for a contemporary design in either square or round shape, there is a range suitable for any bathroom setting.

After the tiling is completed the front of the box is trimmed to the correct depth and the appropriate brassware is then fitted.

V-Box can be used with brassware, enabling one, two or three way outlets. Within the compatible ranges there are bath mixers and bath/shower mixers (including thermostatic) and diverters. V-Box can be used with Suit, Minimax S and X-Line exposed parts, providing choice for consumers. All exposed parts, including the handles are made of metal.

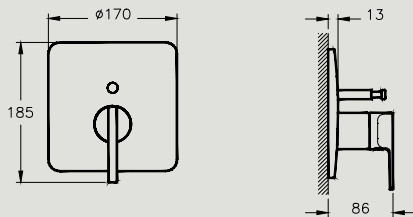

V-Box can be used with the new Suit ranges, Minimax S and X-Line, **providing choice for consumers**

BRASSWARE

Add the perfect finishing touch to your bathroom with our brassware, designed to complement any bathroom suite.

VitrA mixes graceful curves with elegant angles to create brassware that is both aesthetically and ergonomically pleasing. Carefully engineered design ensures flow and temperature controls require only the lightest of touches. Every consideration is given to conserving water and energy without compromising the user experience.

Designed and manufactured specifically for the UK market and to meet the requirements of varying UK water pressure, VitrA brassware is incredibly easy to install. The main body of each item is of brass construction, ensuring solid durability, further underpinned by the reassurance of a 10-year guarantee on chrome plating and 1-year guarantee on moving parts.

The technical drawings illustrate the dimensions of the THERMOCHEM 6000 system components:

- Left Drawing (Plan View):** Shows three vertical rods mounted on a base. The distance between the centerlines of the outer two rods is 180 units. The central rod has a wider top section.
- Right Drawing (Side View):** Shows a side profile of one of the rods. The total height from the base to the top of the curved section is 165 units. The base width is indicated as max. 30 units. The curved section has a radius of 84 units and a 75° angle at its base.

WALL-HUNG FRAMES & FLUSH PLATES

Concealed behind a solid or stud wall, VitrA’s frame systems are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in place. VitrA’s frames allow your bathroom designer the freedom to create a stunning room without the need for expensive structural building work.

INSTALL & SPECIFY WITH CONFIDENCE

PRACTICAL AND ESSENTIAL FOR THE MODERN BATHROOM

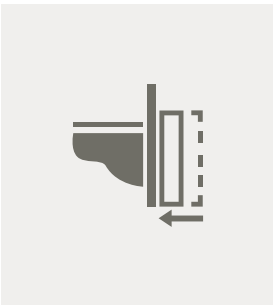

The last thing your beautiful bathroom needs is an unsightly mess of cisterns, pipes, U-bends and other functional elements spoiling the look and ambience. Using a wall-hung frame is the answer, and aside from a much tidier look, there are lots of practical benefits too.

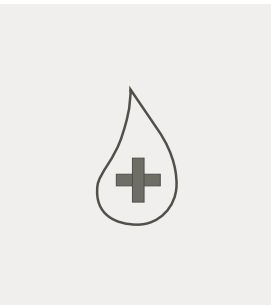

HYGIENIC
Keeping a bathroom clean is so much easier with a wall-hung WC. All pipework, usually a haven for dust, is completely concealed, and with the WC pan fixed above the floor, it's so much easier to keep the floor clean.

QUIET
Not only is the cistern concealed behind a wall, but it's also manufactured with a specially-engineered fill valve, and lined with insulating styrofoam to keep filling noise to an absolute minimum.

SPACE-SAVING
A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

WATER-SAVING
The dual-flush action for both the 8cm and the 12cm wall-hung frames operates at 2.5/4 litres or 3/6 litres, resulting in as much as 70% reduced water consumption, benefiting both you and the environment.

EASY ACCESS
The flush plate can be removed easily, providing easy access to internal fittings. Flush plates have a 5-year guarantee.

QUICK AND EASY INSTALLATION
An intuitive design makes installation quick and easy – a real advantage, particularly when carrying out multiple installations.

QUALITY AND ASSURANCE

RIGOROUS RELIABILITY AND PERFORMANCE TESTING

VitrA's wall-hung frames are subjected to rigorous reliability and performance testing at VitrA's production facilities.

OVERFLOW
An overflow pipe located within the valve acts as a safety device. Overflow pipes are tested to ensure they can cope even in high water pressure areas.

STRENGTH AND STABILITY
Wall-hung WC pans and their concealed frames are designed to be able to support up to 400kg.

FLOW RATE
Our cisterns undergo quality control testing to ensure that they meet international standards for minimum flush volume and flow rate.

LEAK DETECTION
Every cistern we manufacture is individually tested to ensure it is 100% watertight.

PERFORMANCE
All products are subjected to rigorous testing at our production facilities to ensure that they function perfectly before passing quality control.

DURABILITY
Our products are periodically tested for durability according to international standards. To pass this testing, every single component must still be functioning perfectly after 200,000 consecutive operations.

SPECIFIC DESIGN FEATURES

9 INTERMEDIARY HOSE

The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, which enables easy replacement of parts.

1 FLUSH PLATE

The flush plate operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.

8 PANEL GAP

The panel gap on the body is designed to provide optimum opening space for maintenance of filling or flushing units, enabling easy access to the cistern. The size of this gap is very important for servicing purposes.

7 BODY STYROFOAM

The Styrofoam that coats the entire lower body prevents condensation in the cistern and ensures sound insulation.

6 FLUSHING VALVE

The flushing valve transfers the water in the cistern to the WC pan for flushing. For correct and reliable functioning, flushing units are subjected to 200,000 water-tightness and accelerated life tests at the factory.

5 METAL STAND

Metal stands enable easy adjustment of height from the floor and secure fixing.

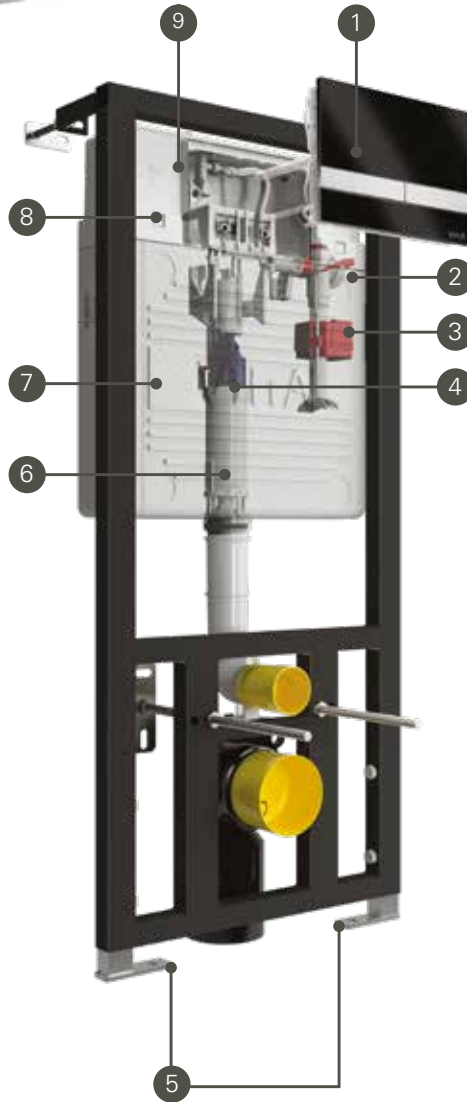

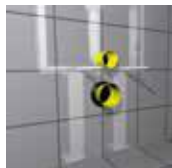

Image for illustration purpose only (regular frame)

2 BODY

The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.

3 FILLING VALVE

The filling valve is the system that fills the cistern with water. The filling valve is checked in Vitra labs for "water-tightness" via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New Vitra filling systems ensure fast and silent filling.

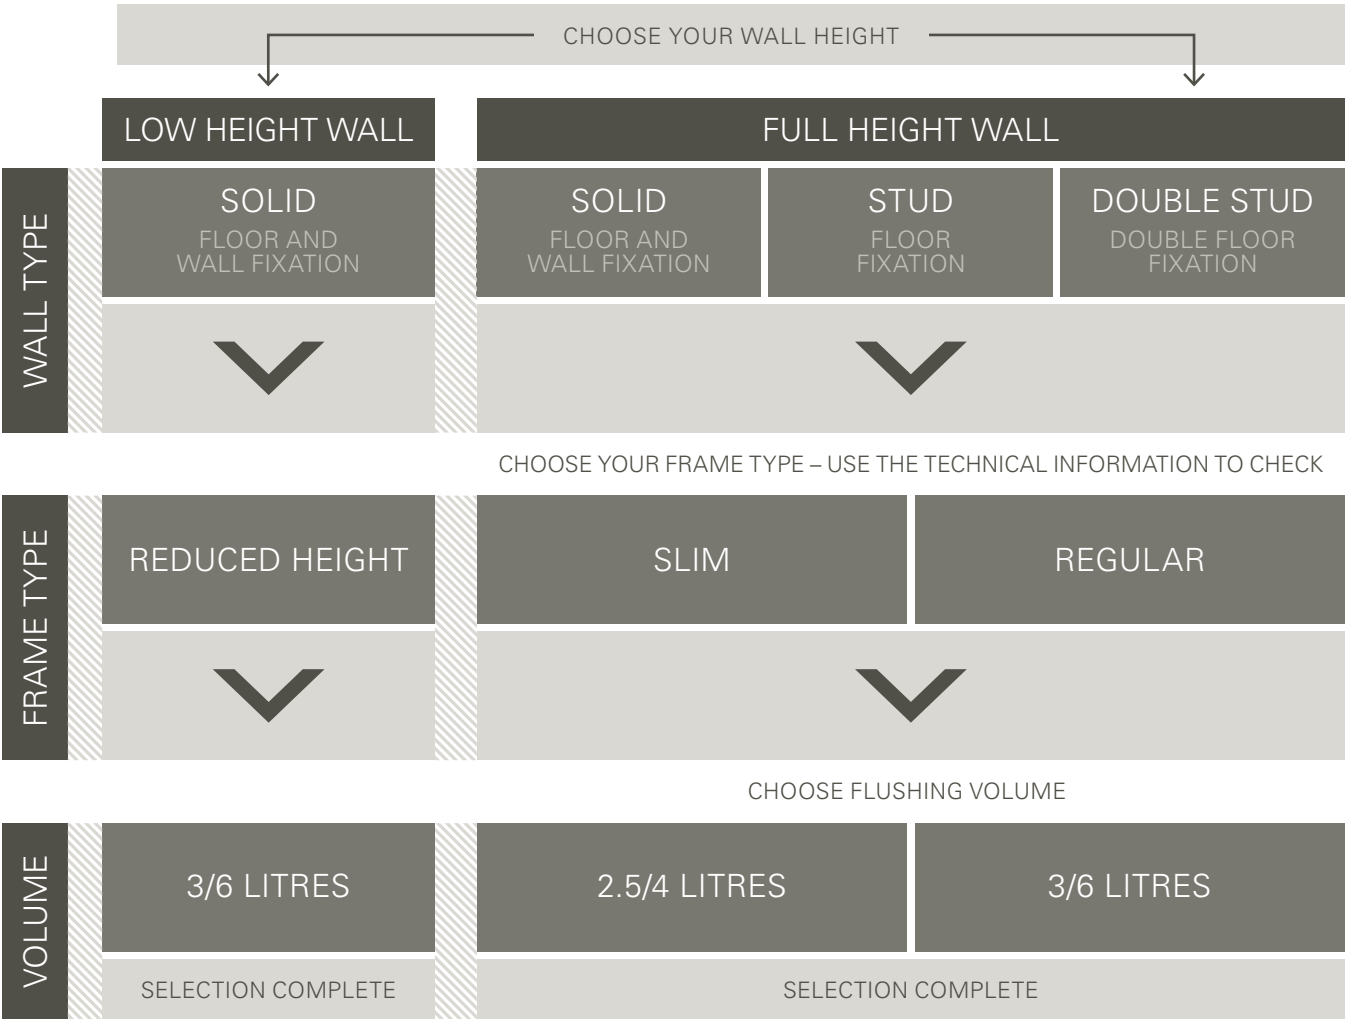

4 OVERFLOW PIPE

The overflow pipe in the flushing mechanism takes the safety duty in wall-hung frames. When too much water enters the cistern, the overflow pipe channels the excess water into the WC pan, preventing the risk of flooding.

FRAMES

Whatever your project needs, the range of Vitra wall-hung frames offers you complete flexibility. Both the slim and regular sized frames can be used in solid wall, stud wall and double stud wall scenarios, and are all available with a choice of flushing volumes. The slimline frame is perfect when space is at a premium.

*Requires 300-1021 Electronic mechanism installation set must be installed during wall application
For horizontal drainage connection please order 436448YP and 436293YP

FLUSH PLATES

With a Vitra wall-hung frame, only the flush plate is visible; two buttons that release either a large or small quantity of water.

Vitra offers a wide range of design solutions, with different finishes and shapes, giving you the freedom to create the bathroom you’ve always wanted.

Most Vitra flush plate designs feature an anti-fingerprint finish. This finish is extra hygienic, as it is easier to clean and protects against bacteria.

For this reason, whether it’s a mechanical, pneumatic or electronic panel system required, Vitra has a flush plate and frame to suit.
