

# VitrA

## VitrA Aquacare Personal hygiene for all

# A mechanical bidet function providing personal hygiene for all

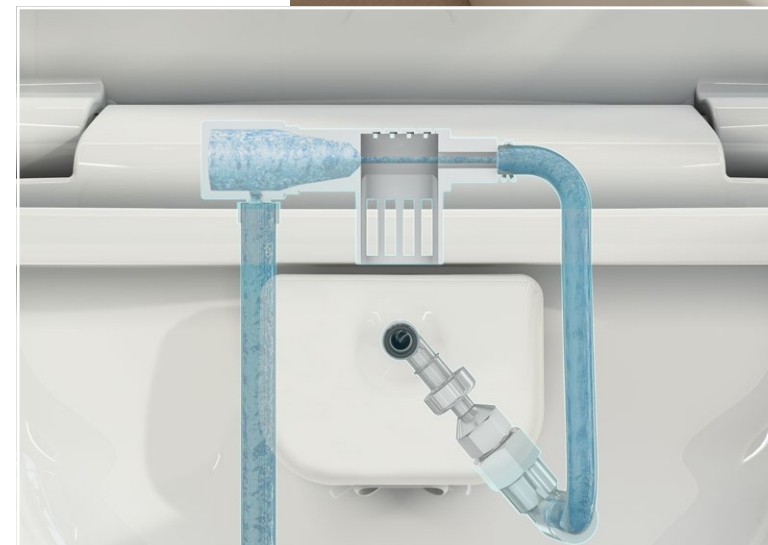

Used in Middle Eastern and Mediterranean countries for many years, WCs with a bidet function are increasingly popular in Europe due to growing awareness of the comfort and hygiene benefits of water-based cleansing after toilet use.

# Highly engineered solution for integrated backflow prevention

VitrA has developed a solution for integrated backflow prevention that makes it much easier and quicker to install a mechanical bidet function, thus widening its appeal. VitrA Aquacare comes as a complete set: a WC with a pre-assembled and integrated air breaker, and a WC seat and cover. The WC pan requires no additional equipment or preparations besides water installation. If maintenance is required, it's easy to reach by one simple click to remove the Aquacare cover below WC seat.

# Double benefits for installers and users

VitrA Aquacare protects potable water against contamination from dirty water while saving time and money for the installer. Additionally, it represents an invisible, concealed solution for end users that offers extra hygiene and aesthetics in the bathroom. Click to remove the Aquacare cover below WC seat.

VitrA Aquacare is available for Sento, Integra and Metropole wall-hung WC pans and is automatically compatible with EN1717. This highly engineered solution is unique around the world and will be LGA and DVGW certified. VitrA Aquacare technologies have patent applications pending.
