

# Brace Bars

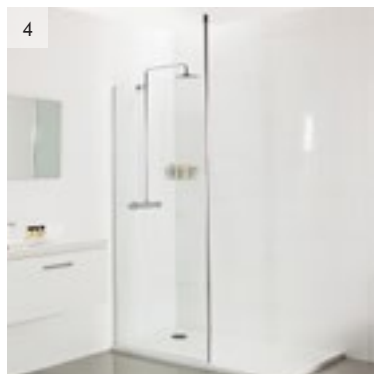

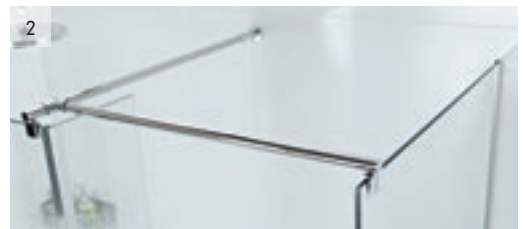

Roman provides a number of different styles of bracing bars, which can be used with 8mm and 10mm glass thicknesses. We offer all configurations that may be required and they can be cut and trimmed to the size required during installation to allow maximum flexibility and use of space. Bracing kits are used to provide added support for the glass and ensure that it is securely fitted in place.

We have something to suit the enclosure style, your bathroom area and your preference, to present the highest level of stability.

Our Square brace bars are now available in Black or Chrome
